LIGHT UP YOUR LIFE!

Experience light in a way you never have before with this amazing birthday party! We take you on a journey as we do experiments with light, fire, and electricity. Create rainbows that flash across the room, let your hair stand on end with our Van de Graaf generator, and even celebrate your birthday in style with indoor fireworks. Who knew exploring science could be this fun? Choose this party and let us light up your life!

SUPER DUPER BOOM

Air is all around us and is definitely in full effect in this birthday party! Get pushy with air and experience different types of gases and their dazzling powers. Create giant cloud rings in the sky, use air to fire a bottle rocket, and even be amazed as dry ice turns your party into the coolest party ever! Hold on to your hat, this party will blow you away!

CRAZY SCIENTISTS

This is your chance to become a certified crazy scientist with our Crazy Scientist! If you love to see explosions, chemical reactions, and weird science this is the party for you. Create a "genie" in a bottle, mix chemicals that go boom, and even make and take your very own Hands-On slime. Be the envy of all of your classmates as you become a certified Crazy Scientist!
