VOLUME 2, NO. 9

VIETNAM NETWORK  
NOVEMBER 1969

# NEWSLETTER

\*\*\*ADMIN

In recommending personnel for promotion, E-4 and above, all DA Forms 2166 (EER's) Enlisted Efficiency Report should be received as soon as possible to Admin, AFVN HQ.

A newly constructed mail room has been built in HQ AFVN in accordance with AR 65-75 for proper safeguarding of U.S. mail.

All personnel are reminded that they are required to call a military taxi upon arrival in country (8th Aerial Port for transportation to downtown Saigon.) However, if you arrive after 1800 hours then you may call AFVN HQ for transportation. Military taxi numbers are: 923-2720/2646.

People are also reminded it is their responsibility to safeguard their assigned weapon. Carelessness is the major cause for lost weapons. KEEP YOUR WEAPON IN A LOCKED CONTAINER WHEN NOT HAVING IT ON YOUR PERSON.

Personnel authorized MPC will not have in their possession an amount of MPC greater than is consistent with their legitimate requirements for such currency. In no case shall an individual have in his possession an amount of cash MPC in excess of \$1,000, in which case he may possess no more than the amount he drew.

Any amount of MPC possessed, delivered, or used in violation of this section will be confiscated, administratively determined to be contraband, and turned into a U.S. Government disbursing office for credit to the U.S. Treasury in accordance with Chapter 12, AR 37-103.

A reminder---no ration items will be given to VN Nationals as bona-fide gifts.

\*\*\*TELEVISION

The month of October found the television section at Saigon a fury of activity.

New, expanded programming extended the hours for many, especially the engineers as evidenced by their great groans and moans; but all seems to be working out in fine style.

Master sergeant McNeese found himself "homeless" when the FM monster took over his office. A couple of days later his desk found its way to TV master control; aiding "Top's" eagle-eye watch of the happenings of the unpredictable TV section.

This month found many leaving for the land of the big "PX", including; SSgt Dave Kramer, ace program-director; head of the night crew, SSgt Ron Huskey; one of our top engineers, Burt Lehman; and SP5 Mike Soares, one of our capable directors.

Specialist Chuck Hayes is back with us after a few months in scenic Nha Trang. The continuity section was given considerable assistance by the "Golden Voice of the 1st Cav.," Sgt W. Corsair McGroarty.

Head of the continuity section, SP4 Larry Cook, moved up to the program-director's chair. And Sgt Buane Bales took over as head of the night crew.

Specialist "Sig" Brandl got back from R&R to Tokyo and the only statement we could get out of him was, "Wild, Man, Wild." Burt Lehman was also just back from R&R and leave, proudly showing off the newly purchased Nikon.

Specialist Art Keys, engineer, spent a week at Nha Trang the beginning of the month. When asked how he liked it, he replied "Ahh...the beach was nice."

Till next month, swing easy and have-a-happy.

#### \*\*\*RADIO

We have a hunch that the Saigon post exchanges were overflowed with extra orders for stereo sets and components in the past few weeks. The reason is that AFVN Saigon went FM stereo. Stereo tapes received from AFRTS, Los Angeles, contain the best selection of music and everyone's taste seems to be pleased.

The automatic programmer is great. As the newswriter wrote for "Stars and Stripes" it can do almost anything a live announcer can do without ever getting tired or a sore throat. What he forgot is that the human element is always needed "to turn it on, and off."

The new AM programming cycle began October 19. Listeners have noted a shift of hours for certain programs which AFVN felt would be of benefit for the majority, and the minority too, since the aim and important mission is to satisfy each and everyone. Vietnam's most popular show "Million Dollar Music" moved to an evening prime-time block, the "Go" program was put back together again and now occupies a two-hour block from 7 to 9 p.m. week nights. The "Grand Ole Opry" was moved to 9 p.m. on Saturday nights, the "Tonight Show" was added at mid-night on week nights, and "Solid Gold" returns on Sunday nights. Permanent residents (we mean us stationed in AFVN Saigon) should keep a cup hidden somewhere for when the snack bar runs out of cups. It is a pity to see so many elongated faces going around like crazy, looking for a kind soul to lend them a cup. And sometimes someone will be hurt when looking for his cup and someone else has already "borrowed" it.

There are two pistol-packing braves at AFVN. Without going into detail we can just say that one is assigned to the Radio Branch and the other to the Admin section. Those breast straps and holsters give them the real "Combat" look.

If you are wondering what "Music Power" means, ask SP4 Roger Ashworth. Roger is the one responsible for the latest package of AFVN musical jingles. These jingles have been sent to all detachments and has certainly enhanced the AFVN "Net" sound. A real great job, our thanks from all goes to Roger. You might have also noticed that new systems cue, station ID and that "wild" new sounder before the hourly time tone. The news intros and extros also have a new professional sound.

We regret to say that Net Radio has lost two of its best announcers, SP5 Dave (La-La) Esch and Herbie "Go" Kneeland who departed Vietnam when someone said "Go East Young Man, Go East." Good luck to both of them.

That wonderful variety of new spots you've been hearing is the product of the concerted efforts of our production people, announcers, supervisors and cleanup girls. Everyone pooled their ideas and heads together for the best in spots.

#### \*\*\*\*NEWS

By now, everyone on the network is familiar with the new news "sound" on radio. Many extra night time hours on the part of radio production went into this new opening, designed to enhance the overall "music power" theme of Network Radio. News announcers greeted the change with enthusiasm, and quickly fell into the format of time, headline, introduction and news. Special thanks for the new sound go to SP4 Roger Ashworth, who put in the aforementioned long hours, and literally sweated out the clearance on the jingles. Incidentally, if the talent on the news intro's sounds a bit unfamiliar, there is good reason. Army Sgt Steve Sandos, stationed in Saigon with a signal unit, is responsible for giving Radio News still another voice, exclusive, yet.

Our "knock-off-the-moral" "Top" Kyser, has just returned from a 30 day special leave to the world. He came sauntering in with a three-day growth of beard and a grin from ear-to-ear. We have yet to learn if the grin is from the leave, or the fact that he has a new job! "Top" got back in time to pack up and leave the Saigon station to become the Det Commander at loveable Tuy Hoa. However, in all fairness, we should point out that he was back in Saigon within a week, minus the grin. What's this, "Top"...R&R after just a week? It goes without saying that the news department will sorely miss "Top" Kyser. He goes with the best wishes of all for much success at Tuy Hoa. The new News NCOIC is SFC Bob MacArthur.

The Network News Service has expanded somewhat, with the addition of one new man and a much greater workload. Marine SSgt Norm Garrett's idea to send

all incoming ABC and CBS newsfilm to the detachments has now been incorporated. Under the new system, the film goes onto video tape as it is received. The same day, kine's are made and mailed to the detachments. Now, each news department should be receiving more useable film, and getting it faster than ever before. Scattered incoming comments on this service have indicated that the idea is meeting with much approval around the net. Net News Service was a two-man operation before, but sadly, Norm had to do it alone. Now that it is a four-man operation, Norm has been joined by Army SP4 Mike Newsome, on TDY to the net from the 1st Air Cav Division.

Of interest to all is the forthcoming Apollo-12 moon flight. Air Force Sgt Hugh Morgan and brand new SP5 Bob Lawrence will be the dual anchor men for this moon flight. It should be quite a show, as the two have practically gone to the moon and back with their planning. Word has it that SP5 Lawrence is contemplating a working model of the lunar landing vehicle for the set. He has been devising ways to have Sears, of all places, donate one of theirs. Good Luck.

One most important part of the news operation has yet to be mentioned in the Newsletter. Our outstanding photo section, headed by Chief Tony Antoine. Two other Navy photographers, Bill Warren and Randy Jones, joined the section some months back. Between the two of them, some very fine footage of local events has enhanced the on-air TV news. It has been noted that the two are handy with their 35mm's also. And Randy already has a reputation as a "ladies man." Next time you get to the Saigon station, ask to see his collection. Look out Pete Gowland.

And, we dare not forget the lone Army addition to the photo staff, long suffering SP5 Richard Bender. Since joining the photo team, Dick has spent a week as duty driver, pulled most of the police details, and enjoyed most of the other sidelines at the Saigon station. In between though, he has also shown

## **Can YOU Help?**

that he belongs in the pro ranks along with the Navy. Specialist Bender isn't feeling the effects of being the lone Army type in photo as yet though, as at the moment SP4 Taylor is with him, complements again of the 1st Air Cav Division.

Around the newsroom...SSgt Wayne Cannon has been heard (frequently) emitting a strange humming, of late. Could it be he is looking forward to something? Marriage, maybe? By the way, Cannon, we are still waiting for an explanation of those "fan" letters you started receiving after the WAC Detachment's tour of the station!

Our "Big Gun," GySgt Carter is just back from the exotic pleasures of Tokyo, and rarin' to go. Unfortunately, that's rarin' to go back to Tokyo! Word has it that he just may be doing that. Look out Stars and Stripes!

Another traveling man is photo Chief Antoine. Tony can't win for losing, it seems. First, he gets promoted to Chief, which means he must purchase new tan uniforms. So, Tony zaps off an order to Thailand,

then settles back to wait with all the confidence in the world. Lo and behold, when the uniforms get here, they fit perfectly, except that they are Thai Navy! Undaunted, Tony took R&R to Bangkok, and, during a spare moment, got his Chief's uniforms. Only it seems that someone lifted his luggage on the return trip! It happened to be the luggage with the new uniforms.

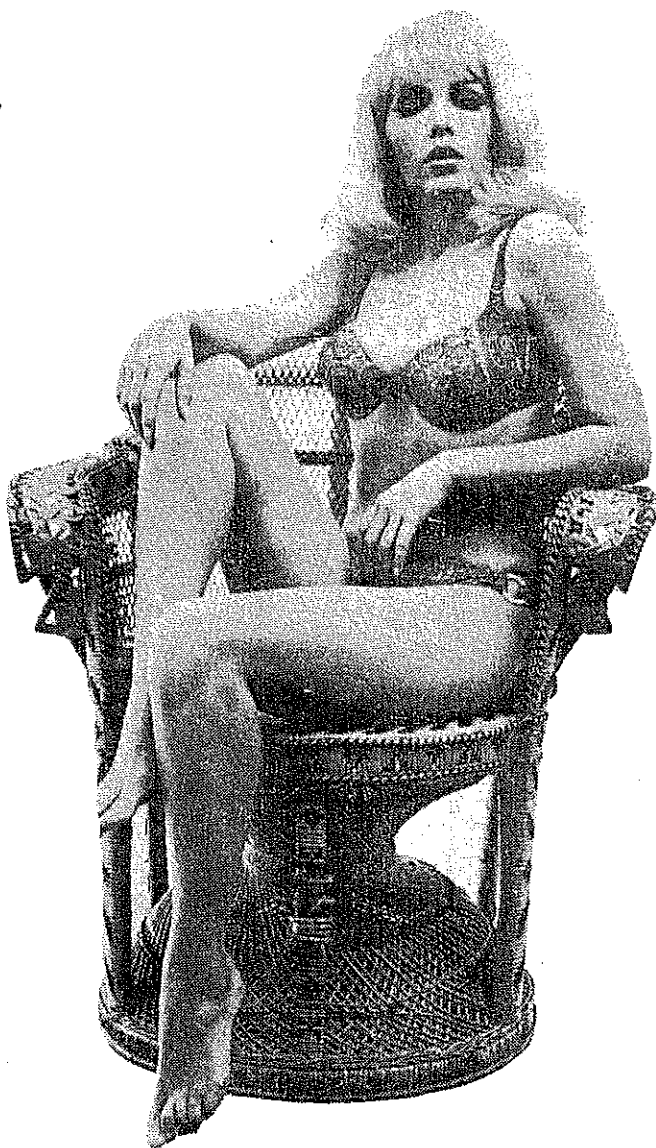

And, speaking of Chief Antoine, while he was gone, his crew did some remodeling in the dark room. It is said that he banged into the new wall six times his first day back on the job.

Another recent addition to the staff is SP5 Jim Allingham, our triple-threat man, who does equally well as radio news reporter, TV news reporter, and news film librarian. Jim was called into the OIC's office the other day. On the way he was heard to mutter "What have I done? What have I done?" What he had done was receive a letter of commendation from his old unit, headquarters of the 5th Army in Chicago!

By the time this letter is published, another new arrival, Army SSgt Larry Carmody should be well established at his new station, Da Nang. Larry has spent the past couple of weeks getting acquainted with the news operation in Saigon.

For some reason, sports has always been after news, and who are we to break tradition? After the departure of imaginative Joe Moore, now civilian, and living it up with a station in Hawaii, sports became the Press, Tom and Larry show. Press is Army SP5 Preston Cluff; Tom, Marine Cpl Tom Sinkovitz; and Larry, our newest sportscaster, is Army SP5 Larry Green, formerly of Net Radio. One thing I can say for our sportsmen...they don't get too pushed out of shape at the guys who call immediately after a scoreboard, and want all 300 or so college football scores read, over the phone! It has been suggested that someone cut a cart, and feed it into the phone every time someone calls for a score.

And that will do it for this month. More next time around.  
Late Bulletin: Congratulations to new SSgt's Preston Cluff and Jim Russell, and welcome aboard to Photographer 1st Class J. S. Cary.

\*\*\*\*DET ONE

If a house is not a home, you can't prove it by the men of Det 1 as our new billets near completion, enthusiasm in the detachment is running to a fevered pitch...dampened only by the monsoons. Of course everything has been dampened by the continuous deluge of the past week; still the construction continues. In one short month great strides have been made to alleviate our critical housing and work area shortage. First the conex. housing was relocated, ground leveled, ditches dug, forms set, and rocks hauled in preparation for the pouring of a cement pad foundation. After two weeks of sweat and tears on the foundation, work was begun on the skeleton of the self-help building. The walls and roof were rapidly completed, enabling the edifice to be self-supporting. With the construction of the doors and windows, the completion of the inside and the painting of the exterior of the building, the men of Det 1, haggard and tattered, moved in. This will enable the quonset to be returned to its original use as offices and work area. There has been discussion about commissioning someone to paint murals on the ceiling of the billets but final decision on this has been deferred to a later date.

In the meantime, site preparation for the TV studio/FM building has begun. Holes have been dug for the needed wall. Gunnery sergeant Monk was assigned the task of securing the building itself. To accomplish this he trekked to the Delta, tossed the building onto a truck, and cannon-balled to AFVN HQs in Saigon where the building was palletized for shipment to the detachment.

For the past month radio's "four horsemen," SFC Joe Maggart, SSgt Ken Cruz, SP5 John Smear, and SP4 Ron McNulty have been involved in "Project Local." This intensified effort to enlist the help of all elements in the Qui Nhon support facility in promoting and publicizing their activities is starting to bear fruit. Enthusiastic response has been received from the USO, education center, Red Beach recreation area, and the Qui Nhon dial telephone exchange among others. The three local hours of programming have added additional "Request Music" with satisfying results.

The detachment has had an influx of new personnel. At the TV section, the news department adds SP4 Stu Meyer who is TDY from U.S. Army Depot in Qui Nhon. Stu Hails from Wisconsin and plans to pursue a career in law after ETS. Specialist 4 Paul West is welcomed by the production department. He is from Indiana by way of Fort Monmouth. Airman 1st Donald Taylor completes the triumvirate. He is a broadcast specialist from Indiana and has been assigned to radio.

Other personnel notes...SSgt Bob Batty, our news director, has been transferred to Pleiku to head the news department at Det 3. We at Vung Chua mountain wish to express our thanks to Bob for a job well done. While we regret to see him leave, our loss is Pleiku's gain. Specialist 5 Terry Loughrey was appointed news director, since Bob's transfer. Specialist 5 John Smear has returned for his next six month tour with a satisfied smile after his 30-day paid vacation stateside. Specialist 5 Ralph Carlisle is touring Europe during his 30-day extension leave. In his absence SP5 Ray Miller is doing a magnificent job as program director.

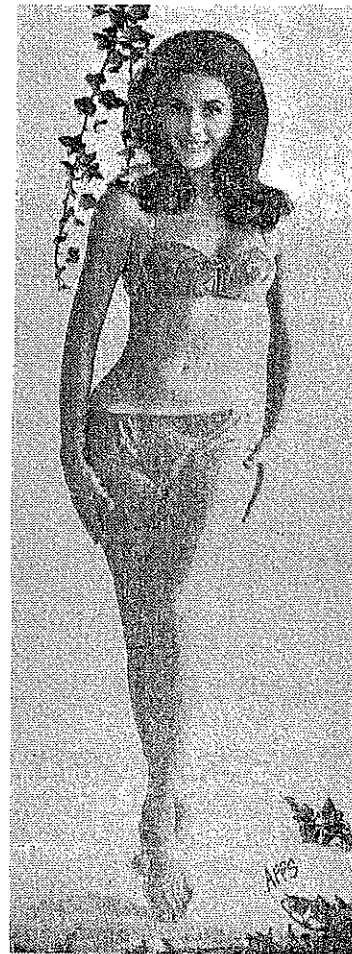

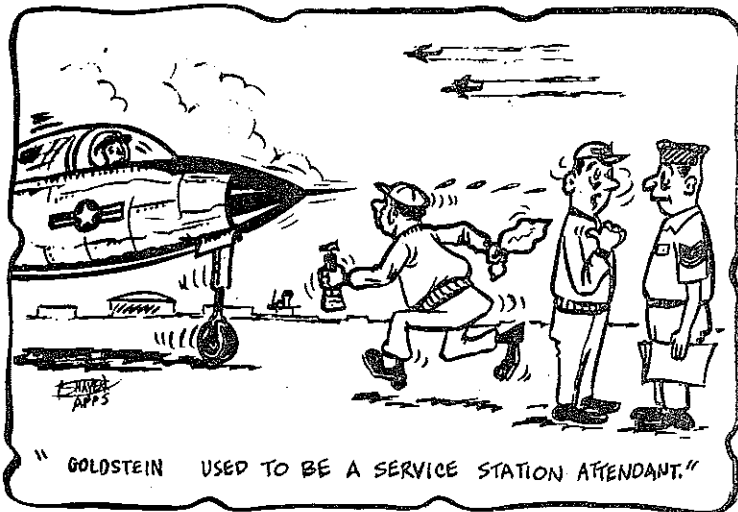

\*\*\*\*DET TWO

Since the last Newsletter, many more changes here on the side of Monkey Mountain. Changes not only in personnel, but also in the physical plant. Welcomed aboard since the last Newsletter was GySgt Benavente who is now in charge of the production and programming departments of radio and television. Benny arrived here from the information office at Paris Island, S.C. Added to our engineering staff was SF5 Phil Maney who hails from the city of Revere in the Bay State of Mass. At this writing Phil is enjoying the monsoon season down on Red Beach, not much sun, but a lot of water, assisting transmitter engineer George Rhode. Taking that last ride down the mountain since the last Newsletter was Harry Simons. Harry is being reassigned to the information office at Quantico Va. Two of our part-timers also made the two and a half mile trip. Mike Blake, our esteemed sportsaster, returned to duty with the information office of the Screaming Eagles up in the DMZ, and John Simmons climbed aboard a bird to Bien Hoa and the long awaited freedom bird back to the states where he will be discharged from the service.

Much needed renovations were made to our combination day room and party room. Detachment Two is now the proud possessor of would-you-believe a ten foot bar and a breakfast nook. Whenever you're in the area drop in, the door is always open.

A replacement was received this past month from the 620th TCS who operate Panama Site here on Monkey Mountain. A celebrety yes, but a radio and TV personality no. After repeated training and instructions, she still eats books,

but what can you expect of a monkey? They say that a body is a body, but this is ridiculous.

COLD FRONT?—"When a cold front moves in, be sure to dress appropriately," says Linda Harrison.

This past month we have had visitors from all parts of the globe. From Germany, France, Marine Corps Headquarters and also our local area. A group of frauleins from the German Red Cross ship "Helgoland" graced our heights as did a French correspondent from the Paris Match. Colonel McDaniel, audio visual chief, HQMC, spent the better part of a day discussing innova-

tions in the commercial and military fields of radio and television. A very interesting day. And then there was the visit of LtGen Lam, ARVN, I Corps Commanding General, who arrived with his entourage of seven jeeps, and enough brass to staff the first floor of the pentagon. Red Sovine of country and western fame, graced our studios for a morning and recorded VTR interviews and appeared on our local C&W show as a guest. A fine entertainer, and a fine job for AFVN.

And that's 30 from Da Nang for this edition, with the monsoons just about upon us it's time to float this copy down the mountain and out to the Air Base for it's journey south on the "White Whale."

\*\*\*\*DET FOUR

It hardly seems possible that another month has rolled by here on the "rock" since the last Newsletter input went in, but according to those who know, it's again that time of the month.

We at Det 4 would like to introduce you, the Network, to our new OIC. He's Capt Robert Sanders, who came to the "rock" from the mobile TV detachment at Tobyhanna Army Depot. At Tobyhanna, Capt Sanders was assistant operation's officer, and has already started putting his good ideas into practice here at the detachment.

Specialist 4 Tom Benintende came to Hon Tre from Long Binh, where he had gotten lost in an admin section with his 7LR MOS. Tom got here just in time to see our FM station, Sgt Ron Carita, leave for R&R in Hong Kong. (Ron's lucky that Jeanne didn't find out about that) Anyway, Ron got back to Hon Tre just in time to pack his gear and split for Saigon, where he helped out in the news department until his DEROS. As for DEROS, Sgt Carita lucked out and got stationed in a Marine Corps Public Relations job in downtown Los Angeles. Some guys have really got it rough. Good luck Ron!

Somewhere in the past, I was talking about Tom Benintende, and now Tom is our FM station, doing a fine job with it.

Shortly after Tom's arrival, Sgt Wilford was transferred from Dragon Mountain to Hon Tre, to take over the program director's slot. (Kind of like out of the fire and into the frying pan)

With the arrival of Bob Wilford, Chuck "Chipmonk" Hays was recalled to Saigon, to take charge of a night shift in the film library. Our thanks to the "Chipmonk" for helping us out, and good luck at the new job.

Specialist 5 Bob Trotter came from a stint with MACOI to our AM affiliate in Dong Ba Thin, to relieve Bob Motaz, who was splitting for the "world" and ETS. The problem stemming from this arrangement was that Motaz was an engineer, while Trotter was a broadcaster.

Our new program director, Bob Wilford, went to headquarters for the recent program director's meeting, and while there, he was presented with an award by the Network OIC, LtCol Adams. Bob received an American Freedom's Foundation Award for an essay which he wrote last year while stationed at the San Diego

whoa!

Marine Corps Recruit Depot. Bob has received an award of honorable mention for his contributions to the contest for the past five years. This year should be no exception, as he has his essay on "My Hopes For America's Future" in the final stages. And Bob practices what he preaches. Since taking over as program director, he has worked hard on promoting the current contest on the airways, both radio and television.

Technical sergeant Earl King at Det 4B just keeps getting shorter, and should be gone by the time this letter comes out in print.

Detachment's 4A and 4B had the privilege of hosting the Network Deputy OIC, LtCol Harlan, for two days at the beginning of October. The detachment felt honored that it was chosen as the first up country station visited by LtCol Harlan.

And that about takes care of the past month on the "rock." See you all next month. This is Det 4 clear with the Network.

\*\*\*\*DET FIVE

The last month has certainly been a busy one for the AFVN "Good Guys" stationed in the picturesque area of Quang Tri.

The Det Fivers have been saddened somewhat by the departure of SP4's Bob Kemper and Travis Gray. The two men, members of the "Screaming Eagles," have been transferred back to their old unit. Quickly filling their racks were SP5 Paul Baldrige and SP4 John Dixon, who were sent to this detachment from AFVN HQs to assist us in taking advantage of the wonderful outdoor recreation facilities. To the departing men, we say thanks for a job well done, and to the new arrivals, we extend a hearty hello and welcome aboard.

If anyone has questions concerning the nurses and life aboard the hospital ship Repose, feel free to contact our specialist on the subject Sgt Tim Nichols. He was spending time aboard the ship for ulcer problems but decided to our lovely establishment, where he is helping to increase the sale of Maalox.

In the promotion department, Thomas Deaner received an increase in pay that goes with the SP5 rating, and our newscaster Lynn Packer advanced to SP4. A meritorious promotion ceremony was held for "Shortround," our ferocious mascot, who has been selected for Private First Class.

A pinning-on ceremony was also held for SSgt Frank Segreto who received his first good conduct medal. The only statement we were able to obtain from our newly decorated hero was, "It's about time!"

Closing out the month of September, we find GySgt. Dave Mossman checking out his hula skirt as he prepares to head for the sunny land of Hawaii, where he claims to get in some good fishing and a little surfing. However, if Det Fivers know our NCOIC, all we can say is, "Girls---lock your doors and hide the liquor, mad man Dave is on the loose!"

With the month of October came the rains, and I do mean rains! 'Ole "Mother

Nature" did her thing and drenched us good. Master sergeant Repsher from HQs can testify to that fact as he was delayed in leaving after a visit here because the roads were washed out and planes could not land. We are slowly pulling ourselves out of the mud and getting dried off. With the rain, which we are still getting, came lightening. Sighting in on our generator, "Mother Nature" let a good bolt go and put us off the air for 18 hours.

Specialist 5's Pfeiffer and Deaner have packed their bags and headed for Saigon where they will process for DEROS. Before departing their home away from home, the two men handed over their short-timers attitude to Sgt Timothy Nichols and SSgt Ralph Dowling.

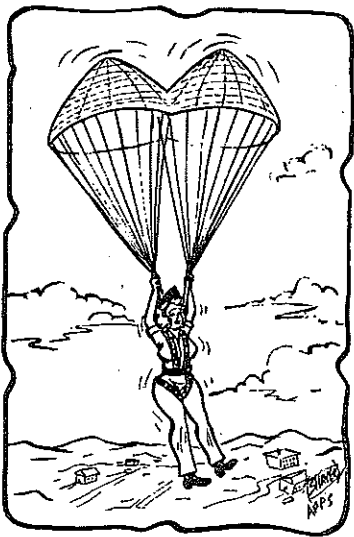

We would like to announce that the winner of the Det 5 "time on the road" award, presented to the man we have seen the least of since the last Newsletter, is none other than our skipper Capt Lou Chatelle. Congratulations, Captain--- please come home!

In closing for this issue, Det Fivers would like to express their sincere appreciation to all detachments who have assisted us in accomplishing our mission---we love you!

#### \*\*\*\*DET SIX

The news from Det 6 matches the size of the organization---sparse. Senior master sergeant Sam Kraus departed the resort area of AFVN in a hurry for his long-awaited DEROS, leaving the detachment in the capable hands of MSgt Tom "the hawk" Hawkins. Until early October, the Hawk wore several hats---detachment NCOIC, chief engineer, etc. Then the Marine Corps invaded Tuy Hoa. "Top" Kyser arrived from Saigon to take over the detachment and the Hawk heaved a big sigh of relief. Things had started to get a little tight in the engineering department with the departure of SSgt Ray Bowen for DEROS, followed closely by SSgt Ed Egan and the Hawk wasn't really looking forward to 26-hour days.

Detachment 6 is on the new programming schedule and all hands are really pushing to meet the requirements of a 12-hour broadcast day with three live newscasts. Everyone is doing double duty and holding up very well---so far. Staff sergeant Art "play it safe" Burnett is PD, pulls board and camera shifts, reads news and sports and serves as the detachment safety NCO. Specialists 5 Barry "daddy" Garmon is our primary newsmen as well as taking his shift on the board and camera. Three newscasts a day and getting the slides back in shape manage to keep his mind off a certain young lady who arrived not too long ago. Really Barry---the baby's arrival wasn't that unexpected was it? Airman first class "Combat" Bob Young is our number one production and continuity man in addition to filling in on news and sports, the board and camera. Sergeant Tom "knuckle whacker" Bull is our top-flight board man and live show director in addition to handling all the film librarian requirements. Tom and his 24" ruler are quite effective in training new men to operate the

board even if his methods are a bit unorthodox and painful. Isn't that right Barry?

Operationally, we're in pretty fair shape with a new studio just waiting for some additional equipment to fill it up. Time will tell just what's going to happen, but the rumors are great!

If only the transmitter would quit blowing up, the Hawk's ulcers would quiet down and SP4 Gil Tobin, sportscaster, boardman and general swing man would quit getting trampled by the engineers as they race screaming into the van.

So much for this month from the "fun in the sun spot" of AFVN --we'll let you all know when it quits raining here if the beach is still there.

Editor's Note

Again this month, I want to thank those detachments and sections who submitted inputs to the Newsletter. Those who didn't submit inputs probably didn't do too much this past month, that was noteworthy.

## AFVN NEWSLETTER EDITORIAL POLICY

The AFVN Newsletter is an informal communications medium published monthly as a means of exchanging views and ideas between Headquarters AFVN and detachments. News items from detachments should be included as attachments to weekly operation reports. Items not received prior to the 15th of the month will be included in the Newsletter for the following month. All items must be typed, double spaced, on 8 X 10½ bond paper.
