SBCC-24T

Business Card Cutter

Shark Finishing Machinery proudly presents the SBCC-24T Business Card Cutter, a powerful addition to the Smart Line of print finishing equipment. This fully automatic system features standard gutter-cut capability, delivering 24-up business cards from a 12" x 18" sheet with outstanding precision and consistency.

Engineered to handle a broad range of media, the SBCC-24T effortlessly processes coated and laminated stocks, card stock, and other printed materials. A built-in registration mark reader ensures accurate cuts on every run, while the intuitive LCD control panel and integrated waste bin provide smooth, clean operation. Designed for both performance and longevity, the SBCC-24T is equipped with long-life, self-sharpening blades that maintain consistent quality with minimal maintenance. In a single pass, the machine can produce up to 500 business cards in under three minutes, maximizing productivity without sacrificing accuracy.

Optional postcard cartridges add even greater versatility. Easy to operate and built for dependable performance, the SBCC-24T delivers professional results at high speed, making it an ideal solution for today's demanding print environments.
