

PEMY Consulting, LLC

Repair Plans Done Right

PEMY Consulting is highly experienced in storage tank management, inspection, and repair. We can assist you in developing repair plans for

even the most complicated tank repair scenarios. Weak repair plans cause confusion, take more time to execute, cost more money, and are unsafe.

We are here to help

- Repair plan development
- Tank repair management
- Procedures, specifications, and drawings
- Change of service, alterations
- Complex multi-discipline projects
- Equipment failure, investigations
- Risk assessments, decision making
- Advanced engineering analysis

PEMY Consulting recently performed an investigation of an external floating roof fire caused by lightning strike. We developed an inspection plan, performed onsite investigation, and authored a comprehensive tank repair plan.
