# STEMMLER ARCHERY

CATALOG 165

1962

L. E. STEMMLER CO., INC.

MANORVILLE, LONG ISLAND, NEW YORK

*W*E are enjoying a revival of Archery — the sport that has been the practice of kings and the glorification of races.

Rich in tradition, grounded in song and story, the charm of the bow and whispering arrow has survived an age which consigns old things to memory. Since the days when Nimrod was a mighty hunter before the Lord, the bow has sung the same low, sweet note. Expose its cord to the deep breath of centuries — you will hear it sing of the deeds of Robin Hood, the American Redman and the Cretan auxiliaries of the Roman Caesar.

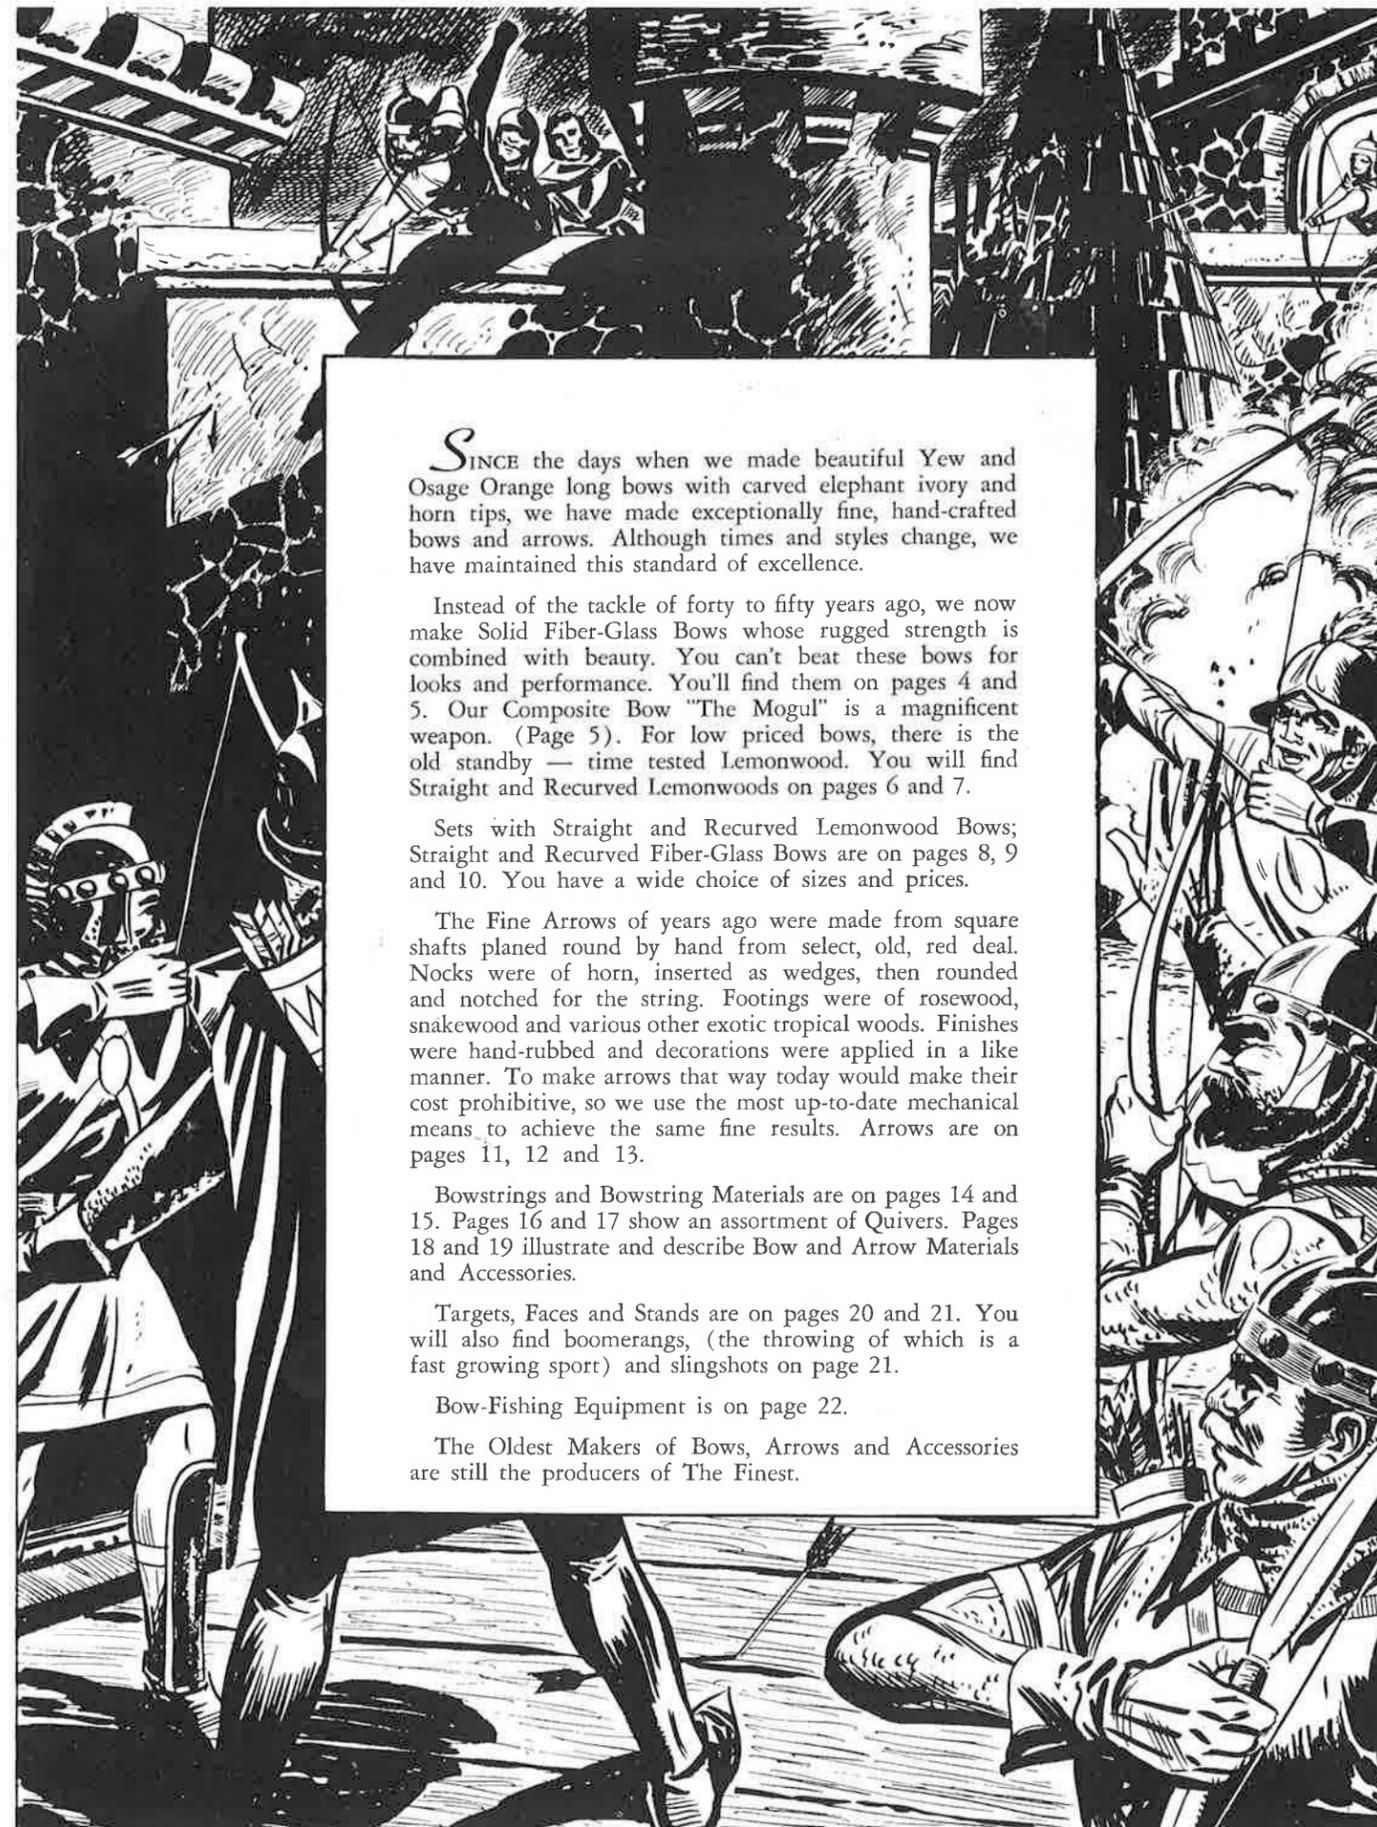

The Song of the Bow was loved by our biblical forefathers. The legends of William Tell and David and Jonathan redound forever to its glory. No sport so intrigues the imagination of old and young, man or woman. Archery has a courtesy uniquely its own and has been held a maker of character since the days of ancient Sparta and Persia. Its gear is simple and it owns the whole year as its season.

There is no reason why this rich inheritance of the ages should not be the property of this.

**L. E. STEMMLER CO. INC.** is the oldest established manufacturer of Archery Tackle in the U.S.A. Fifty years ago we made the traditional Long Bow and Arrows for your fathers. Now we'd like to make modern bows and arrows for you.

**THIS IS OUR GOLDEN ANNIVERSARY — 50 YEARS IN BUSINESS**

1962

*S*INCE the days when we made beautiful Yew and Osage Orange long bows with carved elephant ivory and horn tips, we have made exceptionally fine, hand-crafted bows and arrows. Although times and styles change, we have maintained this standard of excellence.

Instead of the tackle of forty to fifty years ago, we now make Solid Fiber-Glass Bows whose rugged strength is combined with beauty. You can't beat these bows for looks and performance. You'll find them on pages 4 and 5. Our Composite Bow "The Mogul" is a magnificent weapon. (Page 5). For low priced bows, there is the old standby — time tested Lemonwood. You will find Straight and Recurved Lemonwoods on pages 6 and 7.

Sets with Straight and Recurved Lemonwood Bows; Straight and Recurved Fiber-Glass Bows are on pages 8, 9 and 10. You have a wide choice of sizes and prices.

The Fine Arrows of years ago were made from square shafts planed round by hand from select, old, red deal. Nocks were of horn, inserted as wedges, then rounded and notched for the string. Footings were of rosewood, snakewood and various other exotic tropical woods. Finishes were hand-rubbed and decorations were applied in a like manner. To make arrows that way today would make their cost prohibitive, so we use the most up-to-date mechanical means to achieve the same fine results. Arrows are on pages 11, 12 and 13.

Bowstrings and Bowstring Materials are on pages 14 and 15. Pages 16 and 17 show an assortment of Quivers. Pages 18 and 19 illustrate and describe Bow and Arrow Materials and Accessories.

Targets, Faces and Stands are on pages 20 and 21. You will also find boomerangs, (the throwing of which is a fast growing sport) and slingshots on page 21.

Bow-Fishing Equipment is on page 22.

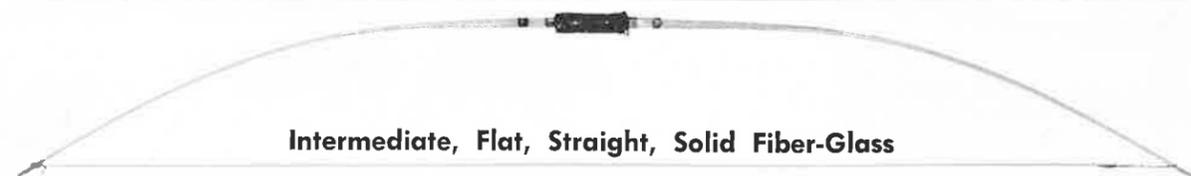

The Oldest Makers of Bows, Arrows and Accessories are still the producers of The Finest.

Both the Straight and Recurved Bows are ground from hand-laid, pre-stressed, properly cured, Fiber-Glass blanks. Years of experience go into the making of these blanks, and they are acknowledged to be the best Fiber-Glass bow stock on the market. Stemmler SAMSON Solid, Fiber-Glass Bows are practically unbreakable. All are beautifully finished.

Price Each	\$33.00	\$21.00	\$12.00

Our Regulation Archery Targets are made of long fibered rye straw by hand. They are very tightly bound and re-tightened. With ordinary care they should last several seasons.

The prices listed are for the straw back together with a skirted or slip-on oilcloth face in the standard archery colors of gold, red, blue, black and white.

## REGULATION HAND COILED RYE STRAW BACKS.

Nos. 24M - 36M - 48M.	(No Faces)
Each	\$8.40    \$15.00    \$28.00

## HOW TO PUT TARGETS ON STANDS

Many years of experience have convinced us that the proper way to put a target on a stand is to hang it from the tripod by means of an adjustable sling. We do not use pegs or extensions because we know that a good puff of wind can blow a target off the stand easily, and the result is a target full of broken arrows. If the target is slung from the stand, the wind cannot blow it off. All of our targets come provided with a rope sling.
