

**Allerpaws Once-A-Day Oral Allergy Treatment (Immunotherapy)**

For veterinary use only • This product is for animals only, not for human use.

**Directions for Use:**

1. Always keep the dispenser in an upright position during use.
2. Turn the spray nozzle clockwise 90° so the nozzle is at a right angle to the dispenser bottle.
3. The first time the dispenser is used: hold the nozzle over a sink and compress the plunger one or two times until spray is discharged.
4. Place the nozzle of the dispenser bottle in the side of the mouth or under the tongue.
5. Fully depress the plunger three times taking care to dispense as much extract as possible.
6. After dispensing the dose, return the spray nozzle to its original position and store until the next scheduled dose. (Refrigeration recommended.)

Clients dispensing treatment must contact their veterinarian with questions and to reorder vials.

**IMPORTANT – Avoid food/drink for 10-15 minutes before and after the dose in order to better aid absorption. Observations can be recorded and noted. Try not to miss a daily dose. In the event a dose is missed for up to three days, continue with the usual volume dose.**
