

SAFETY OVERHEAD HARNES FALL PROTECTION SYSTEM

The Safety overhead System consists of a high-performance, overhead aluminum track and trolley mounted to the ceiling. Regardless as to how much a patient weighs, the harness system prevents patients from falling during very complex balance activities which instills confidence. The patient simply cannot fall and injure him/herself. The system allows patients to elicit and practice protective reactions in the event of a fall and provides support for a patient during all aspects of physical therapy; including sit-to-stand, walking, balance training and climbing stairs. Patients with inner ear problems (Vestibular dysfunction) can train in ways they could not train otherwise.

BIODEX BALANCE SYSTEM SD

Biodex Balance System SD Incorporates both static and dynamic balance testing and training procedures. The system tests for a variety of balance deficits and includes numerous computerized balance training programs. The platform one stands upon can be used statically (fixed, doesn't move), or it can be used dynamically (various levels of movement) to the degree that it is like standing on a surfboard.

LSVT® BIG

LSVT® BIG is a movement treatment program for people with Parkinson's disease (PD). It is based on the principle of neuroplasticity which means the brain can learn and compensate. LSVT uses a single therapy focus (BIGNESS of movement) to improve movement quality in PD. Research is showing the benefits of LSVT BIG to improve one's ability to participate in activities of daily living.

WE CAN HELP WITH:

- Neck / Back / Limb Pain
- Variety of Orthopedic & Neurological Conditions
- Pre / Post-Operative Rehab
- Total Hip / Shoulder / Knee Replacement Rehab
- Sports Physical Therapy
- Functional Movement Training
- Balance Deficits
- Vertigo / Vestibular Problems
- Parkinson's Program

COMPARE US TO THE REST & MAKE YOUR OWN CHOICE

- Fun, relaxed festive healing atmosphere
- No Session Time Limits
- Return visits the same day with no extra charge
- State of the Art equipment
- Specialized procedures: McKenzie Certified, Spinal Decompression paid by Insurance, ATM2 — best device for Back Pain, Manual Therapy, ASTYM — soft tissue release techniques, Active Release Techniques
- Most insurances accepted
