Owner Contact:

Central Hospice is an 8-acre master planned campus that is currently under design to provide an 8-bed Residential Care Center, an Administrative Office Building, and Community Meeting Facilities. A future 8-bed IPU is planned, maxing out the existing site. Office and public facilities will be placed at the front of the site for easy access and reduction of noise from the patient care areas that were located at the back of the site overlooking a small pond. A ring road is required for firefighting equipment access, doubling as an entrance for service traffic, and separating truck traffic from the parking areas.
