

## Ultra-Sensitive Mutation Detection Kits

### **Novel and Proprietary Mutation Enrichment Technology**

Medaysis' Ultra-Sensitive Mutation Detection Kits provide Clonal Differential Amplifier (CloDiA™) PCR using novel and proprietary primers to amplify somatic Mutations and suppress or block the amplification of wild type gene in human genomic DNA.

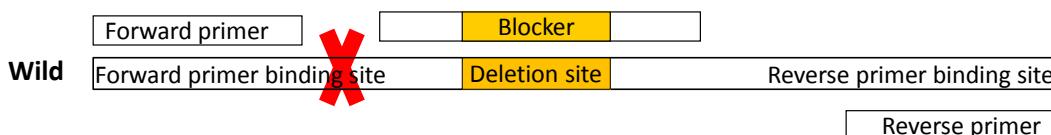

CloDiA™ PCR includes two types of technique - Unindel™ PCR and Stuntmer™ PCR. Unindel™ PCR is designed to detect a broad range of insertions/deletions (universal insertions/deletions) in the target region. The three-primer set comprising forward primer, reverse primer and blocker inhibits amplification of wild type gene but enables amplification of exonic insertions/ deletions.

Stuntmer™ PCR is designed to detect a broad range of point Mutations in the target region. Dual port primer of R Port and E Port is designed for self-competition to preferably amplify mutated gene but suppress wild type gene amplification.

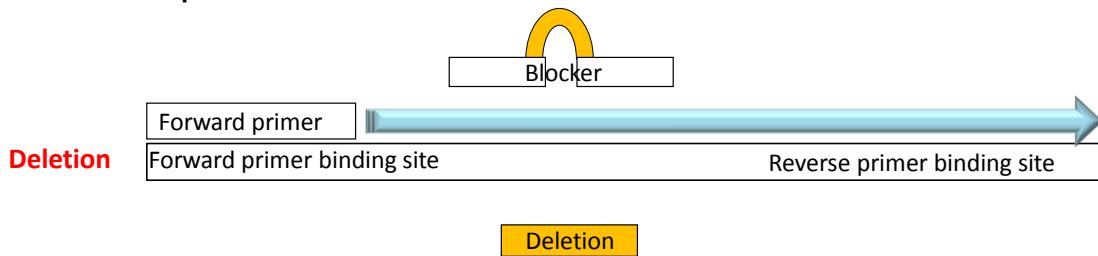

This sensitive and specific method enables the detection of less than 1% (as little as 20 ng to 100 ng) of mutant genes mixed with the wild type. Besides known Mutations, this method can detect unknown Mutations in the target region.

### **Unindel PCR: Detects a Broad Range of Insertions/Deletions**

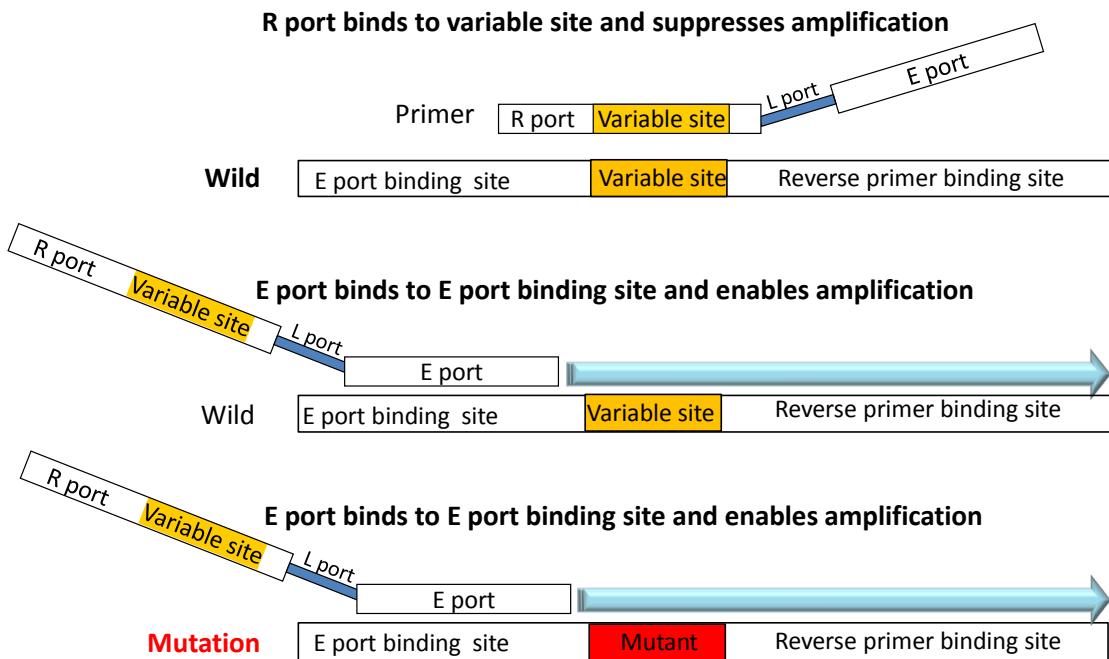

#### **Blocker binds to deletion site and inhibits amplification**

#### **Blocker unbinds from the site and Forward primer binds to the site to enable amplification**

## Stuntmer PCR: Detects a Broad Range of Point Mutations

## Features and Benefits

### Minimal Sample

Small amount of DNA required (20 to 100 ng)

### Compatible Samples

FFPE tissues; Fine needle biopsies; Pleural effusion specimens

### Broad range of Mutations

Hotspot Mutation analysis of target gene

### Ultrasensitive

Detect 0.1-1% mutant genes

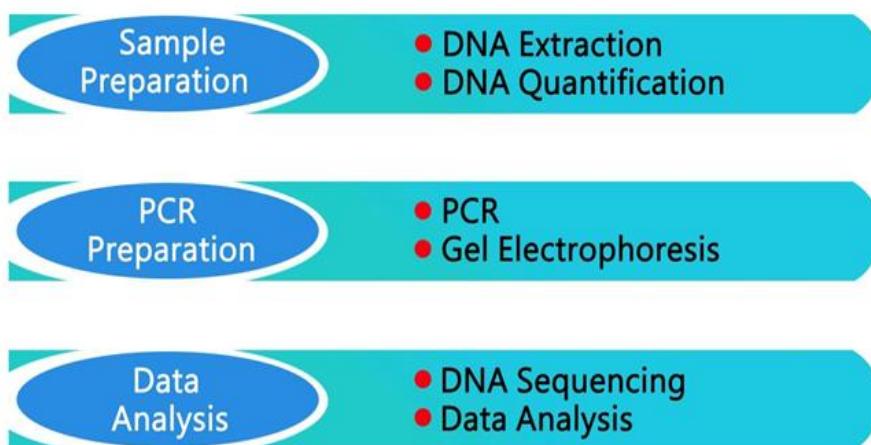

### Highly Specific

No risk of mispriming; reagents do not encode for the Mutation of interest

### Open System

Compatible with various PCR instruments

## Mutation Detection Kit Workflow

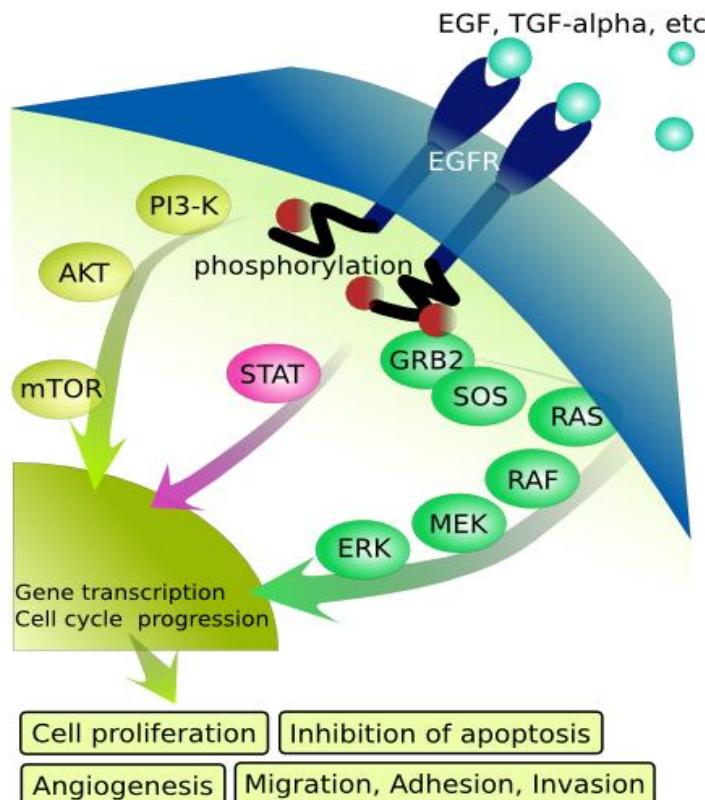

# Medaysis

## Enable Innovation

### Featured Product: Ultra-Sensitive EGFR and cfDNA EGFR Mutation Detection Kit\_exon18/19/20/21

Cat No	Description	Tests
EGFR0001-20	Ultra-Sensitive EGFR Mutation Detection Kit_exon18/19/20/21	20
EGFR0001-50	Ultra-Sensitive EGFR Mutation Detection Kit_exon18/19/20/21	50
EGFR0002-20	Ultra-Sensitive cfDNA EGFR Mutation Detection Kit_exon18/19/20/21	20
EGFR0002-50	Ultra-Sensitive cfDNA EGFR Mutation Detection Kit_exon18/19/20/21	50
