# TRADESTAR

**Tradestar** has the capability and capacity to build equipment for our customers at the right price while exceeds expectations. We take great care to ensure customer confidentiality. We have built processes and physical means of protecting customer intellectual property. We understand these are key concerns to our customers when they choose a builder.

We have the ability to partner with other vendors to provide integration of controls and systems that are not in our portfolio. We have provided seamless integration for customer 'black box' control systems. We also provide aftermarket part support to customers regardless of make or year of equipment. Our knowledgeable service and parts support staff can quickly cross reference OEM or substitute components at the lowest cost and shortest lead time.

Tradestar has the ability to reverse engineer designs and processes which are not covered through recognized intellectual property protection means. Our experienced engineers and craftsman will provide solutions at the right price, time, and quality.

We provide lifetime support for equipment manufactured by Tradestar and can provide on-site training to ensure lowest cost disruption to your operation.

**Technology innovation**

**Lifetime Support**

**Shortest Lead Time**

**Aftermarket parts/service**
