Do not discharge into effluent containing this product into lakes, streams, ponds or estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharging. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance call your State Water Board Authority or Regional

Office of the EPA.

Steps to be Taken in Case Material is Released or Spilled: Use proper personal protective equipment as indicated in Section 8. Prevent further leakage or spillage if safe to do so. Spills/Leaks: Absorb spill with inert material (e.g. vermiculite, sand or earth), then place in suitable container. This material will sink and is soluble/dispersible, it is probably not recoverable. Notify the Authorities.

SECTION 7. HANDLING AND STORAGE

7

Precautions to be Taken in Handling: Store in a cool, dry, well-ventilated area away from incompatible substances. Do not contaminate water, food, or feed by storage or disposal.

Precautions to be Taken in Storing: Do not contaminate water, food, or feed by storage or disposal. Storage Temperature: Ambient. Storage Pressure: Atmospheric. DO NOT reuse empty containers without commercial cleaning or reconditioning. Empty containers retain product residue, (liquid and/or vapor), and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose empty containers to heat, sparks or open flames.

Other Precautions: Spills must be absorbed with sawdust or sand and disposed of in a sanitary landfill. Leaking or damaged drums must be placed in overpack drums for disposal. Do not stack drums more than 4 drums high.
