

Sage CRM 7.2 Software Support Matrix

Updated May 2015

Also available on the Community at:

https://community.sagecrm.com/user_community/m/72_documentation/25765.aspx

Sage does not support installs on a Server/Client OS/Integration that has reached Microsoft End of Life.

Sage does not support running Sage CRM on a domain controller unless it's specifically running SBS.

The Virtualization table has been removed from the Matrix because Virtualization is a deployment environment, and it is assumed that Sage CRM will run safely on any virtualization environment.

Application Server	
Microsoft Windows 2012 Server R2	✓
Microsoft Windows 2012 Server	✓
Microsoft Windows 2012 R2 Server Essentials*	✓
Microsoft Windows 2012 Server Essentials*	✓
Microsoft Windows 2008 Server R2	✓
Microsoft Windows Small Business Server 2011 (Standard Edition)**	✓
Microsoft Windows Small Business Server 2008 (Standard and Premium Editions)*	✓
Microsoft Windows Web Server 2008 R2 (Server only)	✓

* HTTPS, Terminal Services, and CDONTS/CDOSYS are not supported on Windows Server 2012 Essentials.

** HTTPS, Terminal Services, and CDONTS/CDOSYS are not supported on SBS. Direct Sage CRM and MS Exchange integration only supported with 7.1.

Database Server	
Microsoft SQL 2012 SP1 (Enterprise and Standard Editions)	✓
Microsoft SQL 2012 (Enterprise and Standard Editions)	✓
Microsoft SQL 2008 R2 (Enterprise and Standard Editions)	✓
Oracle 11gR2	✓*
Oracle 11g	✓

✓* Oracle 11gR2: If you are using 7.2b, please look at the Known issue section of the Release Notes.

MS SQL Express 2008 is part of the installation and is used for demo and testing purposes only. Multiple installs of Sage CRM can be on the same server in a demo environment only.

Client Operating System	
Windows 8.1	✓ 7.2d
Windows 8	✓
Windows 7	✓

Browsers	
Internet Explorer 11 (32-bit only)	✓ 7.2d
Internet Explorer 10 (compatibility mode only)	✓
Internet Explorer 9	✓
Firefox (latest version)	✓
