COMMUNICATIONS COMMITTEE

2017 END OF YEAR REPORT

Submitted by Sook Seo, E-lists subcommittee chair

Re: E-lists, website & bluebook

Elists:
1. Write letter to Yahoo with Adam to regain ownership of all the e-lists that need to be under the e-list moderator.
a. if we cannot get Yahoo to do that, then we will start a new yahoogroup for presidents and inform old members of presidents that they need to switch to the presidents_new.
b. fine to keep old presidents on presidents in order to access and copy in old pertinent conversations.
c. i can start moving copies over of those conversations, but don't want to start that unless necessary.

Website
1. Summer project to move over all archived pdfs from the old mccpta.com
2. any and all suggestions welcome

Bluebook
1. maybe we could delete all members of all elists at beginning of summer and they must respond to the google form in order to get added back.
they need to give us their current position in order to be put-back on certain elists.

legacy elists, people can request, but they will need to give historical reason for adding
have to do this in stages b/c can only invite 100 people per day to elist.
for presidents need to know ownership status before we proceed
2. while gathering google form responses, adam working with me to write the backend db commands to automate the master list db somewhere?
(i could also just dump the google spreadsheet answers into access too)
3. working on a "replica" pdf in the format of the actual blue book.
automate the updates to the underlying data real time
4. no longer collecting/storing personal addresses
