

# SafeScience® Sustainability

At Green Cleaning Technologies, we integrate green, certified (completely proven) technologies for enhancing the health and safety of the environment, facilities and all the people within, while creating significant **S**avings and benefits.

*facilities include: municipal, offices, schools, medical, athletic, arenas, all housing, hotels, food-related, manufacturing*

## **On-Site Generation of primary green cleaning & disinfecting**

products. At your own facility, generate 2 products that will replace 5 to 12 products typically used, with a cost of \$7 a day for the equipment and only 7¢ a gallon for each certified product. You save 80% of your current product costs and create Sustainable Savings. After you use 5 gallons a day, the equipment is - well, free! **\*CPD1**

## **Electric circuit Harmonic Noise Filtration (HNF)**

in all commercial facilities will reduce your electric utility bill on average **9%-13% per month**. Average ROI is 8 to 12 months, depending on your loads and the component life is 10 years. Ask how your motorized equipment will last 20%+ longer with this HNF technology integrated into your facility. Name one building improvement that provides this \$/¢ payback? **\*CPD1**

## **Indoor Air Quality (IAQ), air disinfecting & air energy savings**

is misunderstood by most architects and HVAC manufacturers. Filters do little. SafeScience IAQ systems solve the problems - for all facilities - and are FDA Approved. Eliminate mold, odors, germs, allergens, VOC's, chloramines, etc. and save up to 45¢/sq ft energy. **\*CPD1**

## **Extended Protection Disinfecting (XPD)**

is non-chemical and has FDA Approval for the hands (24 hour protection vs. 15 seconds with Alcohol sanitizers) and EPA 30 day protection on most surfaces & laundry. Manage risk and the threat of antibiotic resistance with safe, invisible protection. Reduce sick time and absenteeism. **\*CPD1**

## **Fires? Save lives, property and reduce the time fighting fires.**

Protect people and the environment with "cold", green extinguishing technology that crushes fuel, grease, building, forest and grass fires (all except electrical fires). It is skin safe and proven 21x more effective than ABC extinguishers. Available in extinguishers and concentrates. We also have green fire retardants for clothing, fabrics and paints. **\*CPD1**

## **Oil spill, sewage, algae & mosquito Environmental Protection.**

SafeScience strategic partners have lines of products to digest fuels, oils including oil spills, mitigate raw sewage and significantly reducing solid volumes, mitigate toxic algae blooms, reduce mosquito breeding areas, remediate soil contamination & more. Please ask. **\*CPD1**

## **Water purification, conservation and Ag drought solutions.**

When was the last time your ice machine was properly disinfected? We have experience, partners and technology available to prevent and solve many water issues. **\*CPD1**

## **Trash to Clean Energy for mitigating Landfills,**

Municipal Solids, Coal tailings, tires, sludge, biomass, etc. (aka "Feedstock") through patented "Hydrothermal Gasification" energy recapture processes. A SafeScience strategic partner, FENIX Renewal, LLC. has the turnkey solution. Ask us for more information - really - No dioxins, No fly ash, No harmful residuals. **\*CPD1**

**\*CPD1 = Cash Positive Day One savings plus reduced maintenance, inventory and replacement costs**
