

The American Technion Society
in partnership with Southwest Jewish Congress and Hadassah
presents

LAB ON A CHIP: Where Mechanical Engineering Meets Medical Diagnosis

featuring

Professor Moran Bercovici

Technion – Israel Institute of Technology

Aaron Family Jewish Community Center

7900 Northaven, Dallas, TX

Thursday, June 20, 2019

7:00pm – 8:30pm

Seating is limited. RSVP today to Susan at 214-361-0018, or email susan@swjc.org

HADASSAH

Dr. Moran Bercovici is the founder of the Multidisciplinary Microfluidic Technologies Laboratory in the Faculty of Mechanical Engineering at the Technion–Israel Institute of Technology. His lab develops technologies and devices that would accelerate disease detection and enable rapid, sensitive, and low-cost diagnostics at the point of need. His field of “LabonaChip” may revolutionize biochemical analysis and processing in a similar way that computer chips revolutionized data processing.
