

Creating Panoramas in Photoshop from Lightroom

- 1 – If you need to adjust any of the photos in the panorama, sync all the photos so they all receive the same adjustments**
- 2 - Select Photos from grid or filmstrip in Lightroom**
- 3 - Photo – Edit in – Merge to panorama in Photoshop**
- 4 - Photomerge Layout Auto, Blend Images Together**
- 5 - Content Aware Fill Transparent Areas – Optional; Try it, you can always crop the image to remove the fill areas later.**
- 6 - Select all images**
- 7 – OK**
- 8 - File Save after adjustments**
