1. Use the model to help you complete the statement and divide.

3 is  $\frac{1}{4}$  of what number?

$$3 \div \frac{1}{4} = \underline{\hspace{2cm}}$$

$\frac{1}{4}$  of \_\_\_\_\_ is 3.

2. Draw a tape diagram to find the quotient. Then complete the division equation.

5 is  $\frac{1}{6}$  of what number? \_\_\_\_\_

$$5 \div \frac{1}{6} = \underline{\hspace{2cm}}$$

Use the Read–Draw–Write process to solve the problem.

3. There are 15 books on a shelf of a bookcase. This is  $\frac{1}{5}$  of the total number of books on the bookcase. How many books are on the bookcase?

**REMEMBER**

4. Adesh forgot to put parentheses in his equation. Insert parentheses to make Adesh's number sentence true.

$$11 \times 1 + 2 - 3 = 30$$

5. Evaluate.

$$(49 \div 7) + (9 \times 7)$$
