

STANDARD ROW STARTER KITS

If you're looking for a way to put up to 11 gallons of seed-safe starter fertilizer or up to 5 gallons of regular starter in the row, this system will really help. By applying the fertilizer through KEETON SEED FIRMERS or TOTALLY TUBULAR TUBES, you will not have the expense of conventional fertilizer attachments.

KIT INCLUDES:

1. Wilger Monitors
2. Row Orifices
3. Sureflow 12V Diaphragm Pumps
4. 1/4" Air Line Hose for Row
5. Clamps, Gauge, Valves & Filters
6. Screens & Quick Change Orifice
7. Push Lock Fittings

PART #	ROWS	PRICE
SKDFK-4	4 Rows	\$ 509.00 SALE
SKDFK-6	6 Row	\$ 605.00 SALE
SKDFK-8	8 Row	\$ 715.00 SALE
SKDFK-12	12 Row	\$ 1,025.00 SALE
SKDFK-16	16 Row	\$ 1,360.00 SALE
SKDFK-24 (2- Pumps)	24 Row	\$ 1,940.00 SALE

The following kits have all components to go from the pump to the seed firmers. Tanks and wiring are not supplied due to variations between different planter makes. Additional hose may be necessary due to the way your planter folds or the number of tanks you have.

Seeing Is Knowing
 A glance is all it takes to know if the correct amount of liquid is flowing to your spray nozzles or planter openers. When the liquid is flowing equally the balls hover at the same level:
If a ball drops (relatively to the others), the flow is blocked or restricted.
If the ball is rising higher (relatively to the others), the flow is too high, due to a leaking outlet or hose.

WILGER FLOW MONITORING SYSTEM

Wilger's Electronic Flow Monitoring System and Electronic Flowmeter are built from the ground up for consistency and dependability on the farm. With an easily serviceable flowmeter and simple flow monitoring system app, it allows custom threshold monitoring for blockage and any rate irregularity. The flowmeter becomes necessity with the importance of a consistent fertilizer or chemical application, which are plagued by blocked lines, incorrect orifices, blown product hoses, micro-dosing, and chemicals that are too dark to visually monitor. (E.g. humic acid (coffee black), Paralign™ Fertilizer (blood red), Copper mixes, etc.) The system goes far beyond what a visual flow indicator system can provide, giving the actual flow row-by-row, instead of relying on pressure gauges, visual flow indicators or a single system flowmeter. The EFM system can simply be retro-fitted to existing visual flow indicator assemblies, simply being added in-line with the common O-ring Seal (ORS) connections.
