

# RC400

## Single Serve Coffee Brewers

**Amazing Taste. Easy to Use.  
Easy to Operate. Built to Last.**

Brew great tasting single serve beverages with the stylish, powerful, and easy to use RC400. Compatible for use with any single-serve capsule, including RealCup™ and K-Cup®. Pulse brew and pre-infusion are optimized for coffee, tea, and cocoa, and the patent-pending brew chamber ensures even water distribution for full flavor every time.

All the authentic flavors and aromas of your favorite coffee and tea blends, now available in single serve. It's about time, don't you think?

● **Large touchscreen and easy-to-use one-touch controls.**

Digital control makes selection of beverage type and size simple for the user.

● **Faster brew with no lag time, starting the moment the brew button is pressed.**

● **More operator settings, including resettable brew count and customizable default options.**

● **More brew sizes with an adjustable platform for oversized travel mugs.**

Six brew size options from 4 oz to 16 oz. (118 - 473 ml) provide user with the selection of their choice.

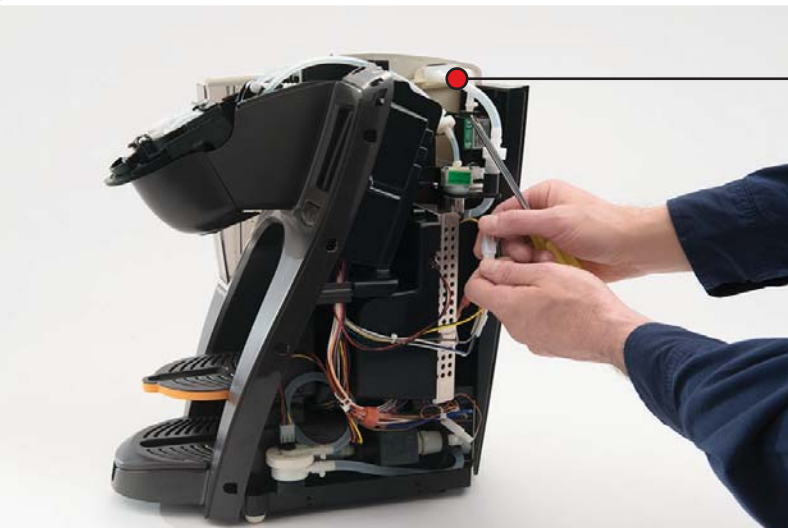

● **Energy save mode engages at a programmed time of day, or when brewer has been inactive.**

● **Plumbed in and pour-over capable right out of the box.**

This versatile brewer can be plumbed into a potable water supply and will refill the reservoir itself automatically. If a water line is not available, the brewer can be used as a pour-over brewer.

● **Added safety with locking brew chamber.**

● **Repairable machine with access to replacement parts.**

Commercial grade parts ensure a long life in heavy-usage locations.
