Repair(s) or Improvement(s) Currently Needed: The headgate was recently replaced and is in excellent condition. The diversion dam is negatively affected by a significant sediment deposition. One potential solution is to move the diversion dam downstream to address the sedimentation issue. Fish passage should be maintained and riparian restoration should be considered as part of any future repairs or improvements.

Structure Description: A boulder diversion dam directs water to the headgate, located on the south bank of Saguache Creek. This ditch services eight ditches.

Comments: This ditch services the following ditches: Morrison Ditch, Fullerton Ditch 2, Fullerton Ditch 3, Moses Goff Ditch 1, Moses Goff Ditch 2, Gotthelf Samora Ditch, Mountfield Ditch, and Mountfield AP Ditch.
