

Now! 11 Exciting Models from Tri-State Archery...

Truly... The World's Finest Bow!

Out of one of the largest plants in the East, comes the most versatile and beautiful selection of composite bows in the world. 11 models... every one produced with a combination of the finest materials available plus the sensitive skills of expert Bowyers. Designs created by engineers on the drawing boards, and then proven in the field.

Compare TRI-STATE bows with other bows you have shot... You will be amazed by their bullet-like cast... the surge of smooth pre-tensed power that reaches out and penetrates at tremendous distances. HERE at last, is more "on target" aiming, more game, and more enjoyment.

THESE QUALITY FEATURES PROVE JAGUAR'S LEADERSHIP

FIBERGLASS BACKING AND FACING

Famous "Perma-Glass," near indestructible woven glass reinforced EPOXY resin. Stress factor in excess of 150,000 lbs. per sq. inch. Impervious to extremes of heat, cold or humidity.

CORE LAMINATIONS

Hard, white rock maple or walnut, precision ground to yield maximum efficiency in the working limb.

BONDING AGENT

TIKON 83-E, specially formulated adhesive for optimum bond and flexibility.

"TRUE-CENTER-SHOT" SIGHT WINDOW

Featured on all models, allows greatest accuracy and full view of target. Wasted thrust and arrow whip are eliminated because arrow passes through center of riser section.

SMOOTHNESS and STABILITY

Design factors of all models provide for smoothest possible draw. (Example: JAGUAR bow in 50# weight draws only 1½ lbs. per drawn inch.) This action relates to stability and speed of the bow by giving consistent impetus to the arrow, thereby increasing cast.

HANDLE

Contoured Owens Pistol-Grip handle, cushioned by costly glove leathers, shaped for maximum comfort, never allows you to "choke" the bow.

HANDLE RISER SECTION

Imported and domestic hardwoods selected for strength and color matched for beauty.

FINISH

The graceful lines of the bow, with all its eye-appealing beauty is further enhanced after receiving a lustrous, durable, moisture-proof finish which is then machine buffed for permanence.

STRINGS

Dacron, double-looped, pre-waxed strings. Reinforced at loops and served at both loops and center with nylon serving for greater wear.

GUARANTEE

All TRI-STATE bows are registered in the owner's name and have a written guarantee covering both materials and workmanship for a period of one year.

TRI-STATE ARCHERY CORP. DANBURY, CONN.

The traditional design of the Turkish bow . . . the most modern of materials . . . the skill of bowyer craftsmen . . . combined to produce this superlative performing bow.

"Used on MORE BOWS by More Manufacturers
than ANY OTHER Type of Epoxy Glass!"

PERMA- GLASS

THE STRONGEST POSSIBLE GLASS
THAT CAN BE USED ON BOWS!

*NO Sanding, Cutting or Scratched Glass
BONDS with Urac 185 or Epoxys*

PERMA-GLASS comes *already sanded* with a perfect surface for bonding . . . nothing to prepare! PERMA-GLASS is cut for you to the widths you specify. PERMA-GLASS now has an exclusive protective tape covering which preserves the finish of the glass through every step of manufacturing. For safer lamination, Tri-State research has developed PERMA-STAY, a non silicone protective covering that will, after sanding, give a better bond.
