

SECURITY FIRE PROTECTION DISTRICT

FALSE ALARM POLICY

Fees must be made out by check to the Security Fire Protection District.

Security Fire Department will now be charging commercial building owners for repeated false alarm responses. The Board passed a resolution on **September 11, 2012**, to change the false alarm fee schedule. The first three false alarms are at no charge, any false alarms thereafter will be charged \$250.00 per apparatus, per alarm for the following 12-month period from the start of the first false alarm.

The District will take into consideration extenuating circumstances preventing a business from correcting and complying with this policy. For example: If a business has made and continues to make reasonable effort towards correcting the recurring problem with the alarm system, the district may waive the charge for that occurrence. The occurrence may still be used in the future to determine if charging the company is warranted.
