

30-DAY COUNTDOWN TO SHAVUOT HARVEST ?

2020 YEAR TIME LINE OF ALTERNATIVE COUNTDOWN TO PENTECOST

The purpose of this illustration is to examine some day counts from the June 20, 2020 eclipse. As noted in prior studies, this solar eclipse was an Annular type. This meant that the disk of the Moon did not completely block out the Sun. The near total solar eclipse left a ring of exposure that appeared to be what many have called the 'ring of fire' or 'wedding ring'. What is also very interesting was that the eclipse occurred on the Summer Solstice, that being the longest day of the year. This, by the way will match in the same year the coming planetary conjunction of the 2 largest planets in the Solar System, Jupiter and Saturn on the Winter Solstice, December 21, 2020. How the Summer Solstice solar eclipse connects with the Pentecost date, projected to be around the 19/20 of July is that is exactly 30 days out. Thus, July 20, 2020 + 30-day countdown = July 19/20, 2020. The 'Wedding Ring'? This is the date that many End of Days Watchers have determined when true Pentecost occurs. As prior studies have calculated, this is based on the double-count of Leviticus 23:16. That is, counting 49 days or 7 Sabbaths and then numbering 50 days thereafter. The slight discrepancies of true Pentecost being either July 19/20 or July 27 is due to when is the start date.

Mar 20 - Equinox at 03:50 UTC

Same month King Nebuchadnezzar began judgement on Israel.

720

A hexagram has 720° from 2 interlinked 6 pointed Stars. A 6 pointed Star equals 360° then back around it equals 720°. It also denotes male-female, plus and negative and a completion.
