

HANDICAP OPERATOR AUTOSWING

- Superior internal components provide the strength and durability needed for high frequency traffic
- Engineered to open doors for the disabled and elderly
- The one way clutch allows the door to be opened manually with incredible ease
- Concealed heavy duty adjustable door stop, therefore eliminating the need for external stops
- Adjustable heavy-duty spring and 1/8th horsepower motor
- Can be used to operate larger, heavier doors in windy conditions
- Requires only simple procedures for fast, trouble free installation and is easily retrofitted to existing doors or new construction without major renovations
- Canadian made and designed specifically for our weather conditions with a warranty of 2 years from date of manufacture
- Stocked header is 39" so that unit can be securely mounted to the door header in normal situations
- Requires 115VAC
- Includes Caution & Activations stickers
- **HA8:** Includes a cast iron, closed gearbox
- **HA8P:** Includes a plated, open gearbox
- Low profile model available with 4" header
