

# MAXIMIZE EVERY DROP BAMBI MAX WITH UNLIMITED MULTIPLE DROPS

An entirely new Bambi Bucket® that offers the same robust, durable bucket that you've come to know over the past 30 years. The Bambi Max now features a lightweight, low power draw, quick operating multiple drop valve that increases volume per drop through a fuel cycle, requires less maintenance and offers reliability for years to come.

## FEATURES

- Lightweight – lightest collapsible multiple drop bucket available on the market
- Low power draw – less than 5 amps (3-wire system)
- Unlimited valve actuations – opens and closes in milliseconds
- Load control – unlimited load sheds (2% of load each)
- Low maintenance – only 4 bolts to remove valve for maintenance

The ability to pre-select loads allows efficiency at both the dip site and over multiple hot spots which can be targeted by releasing portions of water over each one. The helicopter operator can also choose to unload as many separate drops as required. Manual load control is standard in every Bambi Max.
