## IMPORTANT

### USE THE RIGHT TOOLS FOR THE JOB

*In order to deliver professional results when you install a framed banner or a sign, you need to start the job with the right tools. It is as simple as that...!*

*As you will see it is not a matter of investing, because the tools we have tested and that we are going to show you are inexpensive.*

### Hammer (Ref: DBH100)

Price: \$14.95

This 12-oz. double faced hammer is **used for projects that require non-marring blows**. The hammer features two different types of heads, one soft and one hard for working on various tasks.

---

---

**DO NOT USE EITHER  
RUBBER MALLETS  
OR STEEL HAMMERS... EVER!**

---

---

You would have to deliver a blow which is much more powerful than the hard nylon head hammer and could deform or even break the PVC extrusion (TS79W/C/B)

### Hammer Characteristics

Interchangeable heads make it easy to use the right amount of striking force when doing delicate assembly work. The plastic heads won't mark or spark, keeping surfaces damage- and scratch-free. The hammer handle reduces vibration on impact, allowing for more comfortable operation.

- Plastic heads won't mark or spark, preventing surface damage and protecting both the product and user
- Convex striking surfaces minimize bounce
- Nonslip rubber grip for comfort and durability

### Cutter (Ref: CBC-100)

This cutter on the other hand is not easy to find. Tensioning Solutions has found a supplier overseas and especially imported it to be able to offer it to its clients. The changeable blades are razor sharp and the cut allows to seamlessly join pieces of TS79x. This cutter also allows multi-angles cuts as shown on the next picture, it is very convenient.

**Where to find it:** Tensioning Solutions

**Reference:** CBC-100

**Price:** \$19.95

**Contact:** [info@tensols.com](mailto:info@tensols.com) **Phone:** 1-800-436-8242

### Mini Hacksaw

Cut through copper, brass, aluminum, wood, plaster, steel, PVC, CPVC and ABS easily with 30 teeth per inch blade. This mini hacksaw features a heavy duty solid handle with a knurled grip to help prevent slipping.

- Low profile design is great for use in confined areas
- Heavy duty solid handle for easy grip
- Knurled grip to help prevent slipping
- 30 teeth per inch

### Where to buy it?

Home Depot, Lowes and other tools distributors

**Price:** \$8 - \$12

**This mini hacksaw cuts TS79x PVC inserts like hot knife cuts butter, another must in your toolbox.**
