

ETHOS *Power Amp*

The Ethos Power Amp was originally developed to answer the need for stereo applications with the Ethos Overdrive Amp. The power amp utilizes the same 30WRMS power block as the Ethos Overdrive Amp. It can be used with Ethos Overdrive Preamp, Ethos Overdrive Amp, or with other pedals and preamps. Its form factor allows colocation with speakers cabs, or it can be conveniently stacked with an Ethos Overdrive Preamp or Ethos Overdrive Amp to reduce consumption of board real-estate.
