

Kan-Tech is a distributor of water treatment equipment & products from the following companies: Advantage Control, Crane Environmental, Mid America, Vertex, Pulsafeeder, Hach, Taylor, Good Water Warehouse, LMI and Wood Brothers. Examples of items we distribute are commercial & residential water softeners, reverse osmosis systems, lab supplies, water meters, pumps and controllers. We also stock replacement parts for chemical delivery systems as well as water softener valves and media to help minimize downtime for the customer. Our technicians are well versed in trouble shooting and repairing all equipment we sell.

We are a manufacturer of Glycol Feed Systems under the Total Water Management brand with unique features (patents pending). Models include: 1) single system 50 and 100 gallon units with either automatic or manual feed systems; 2) dual automatic or manual systems with either 50 or 100 gallons capacity. Automatic units include audible and visual alarms for low pressure &/or low drum levels, interface with building management systems for remote monitoring and a unique transfer system to carry bulk glycol into the system directly or into a storage tank for mixing.
