Digital Slit Lamp
CSL-10U
Digital Camera IMAX-5
(Included)
Product Introduction

CSL-10U
Digital Camera IMAX-5
(Included)

Features:
The CSL-10U Slit lamps includes a high quality digital camera IMAX-5, an LED illumination system and 5X magnification changer intended for the eye examination of the anterior eye segment, from the cornea epithelium to the posterior capsule. It is used to aid in the diagnosis of diseases or trauma which affect the structural properties of the anterior eye segment.

5X Magnification:
CSL-10U a classic styling and outstanding galilean optics system, with magnification changers of 6x, 10x, 16x, 25x, 40x, pupil range of 52-82mm, for clear observations.

Cross Maneuver Joystick:
All Viewlight’s slit lamps are built with a precise, smooth and high quality joystick. It provides lateral, longitudinal and vertical movements during all patients examinations.

Built In 5 Filters:
CSL-10U slit lamps examinations provides a stereoscopic magnified view of the eye structures in details with built in five different filters that can be inserted. No Filter, Heat Absorption, Grey (ND) Red Free (Green), and Cobalt Blue.

Tonometer: Optional
Viewlight’s RU-100 Tonometer can be mounted and installed as an accessory used for measuring ocular pressure and applanation of the corneal surface.
CSL-10U features a continuous 14 mm aperture reading suitable for anterior and posterior segment examinations. Includes an illumination diffuser, where the light is spread evenly over the entire observed surface.

CSL-10U LED illumination provides a steady 50,000 hours of working lighting time for observation, and optimum color rendition which allows maximum illumination during the observation.

**Fixation Lamp**
Red LED 3.5V

**Slit Angles:**
CSL-10U features an illumination tower which allows examination in horizontal, vertical, and oblique section including option to offset the slit for corneal transillumination. The illumination beam and slit angle of 0-180° & a slit vertical tilt of 5° 10° 15° 20°

**Mirror Diffuser:**
CSL-10U features a continuous 14 mm aperture reading suitable for anterior and posterior segment examinations. Includes a illumination diffuser, where the light is spread evenly over the entire observed surface.
Features:

Compact Size
Widely compatible to different brand model slit lamps.

Compatibility
Light and compact size camera with accurate and intelligent exposure.

Practicable Image Processing
This unique feature can meet most of the operator’s demand.

Smart Auto Exposure
Professional solution makes the camera exposure, more accurate and intelligent.

Centralized Management
Professional patient information management platform is important to conduct centralized management for patient. This platform supports integrated function print.

Wireless Button
2.4Hz wireless solution, no aiming, fast reaction, and stable performance. 3V Energizer Battery Not Included

Easy USB Transfer
One Power cable and data line will produce data transmission quickly and easily. Neither hardware nor computer configuring is required.

5 megapixel resolution
1/2.5 inch CMOS
High definition images & videos

User-Friendly Interface
Simple design style and friendly interface help operators handle it quickly and efficiently.
Overview

1. Lamp Cap Plug
2. LED Bulb Cover
3. Filter Selection Lever
4. Slit Height Control Knob
5. Aperture & Filter Selection Dial
6. Fixing Screw
7. Reflecting Mirror
8. Magnification Select Dial
9. Digital Camera IMAX-5 (Included)
10. Illumination Inclination Lever
11. Slit Width Control Knob
12. Joystick
13. WorkTabletop (Optional)
14. Brightness Control Switch
15. Fixation Target
16. Fixation Knob of Chinrest Paper
17. Chinrest
18. Elevation Adjustment Knob
19. Base Locking Screw
20. Microscope Arm Locking Knob
21. Device Base Locking Knob
22. Wheel Shields
CSL-10U features a continuous 14mm aperture reading suitable for anterior and posterior segment examinations. Includes a illumination diffuser, where the light is spread evenly over the entire observed surface.

**Digital Slit Lamp**

**Digital Camera IMAX-5** *(Included)*

---

**Product Specifications**

- **Type:** Galilean system, Parallel type, Haag-Streit type
- **Magnification Changer:** Rotation Drum Change
- **Magnification:** 6x, 10x, 16x, 25x, 40x
- **Eyepiece:** 12.5x
- **Field of View:** 6x (φ33), 10x (φ22), 16x (φ14), 25x (φ8.5), 40x (φ5.5) mm
- **Pupil Range:** 52 - 82 mm
- **Diopter:** ±7D

**Illumination**

- **Slit Width:** Continuous from 0 to 14 mm
- **Slit Length:** Continuous from 0 to 14 mm
- **Slit Angle:** 0° - 180°
- **Slit Aperture:** Continuous from 1 - 14 mm, φ14, 10, 5, 3, 1, 0.2 mm
- **Slit Vertical Tilt:** 5°, 10°, 15°, 20°
- **Filter:** Heat Absorption, Grey, Redfree, Cobalt Blue
- **Fixation Lamp:** Red LED 3.5V
- **Light Resource:** LED

**Power Sources**

- **Input Voltage:** 100 - 240V 48 - 62Hz
- **Input Power:** 70VA

**Dimensions and Weight**

- **Dimensions:** 740*640*450 mm
- **Net Weight:** 21kg
- **Gross Weight:** 24kg
