

PRODUCT DESCRIPTION

Spectrem® Simple Seal is an ultra-low modulus, preformed silicone extrusion specifically designed to have high elongation properties. Simple Seal is typically bonded with Spectrem 1 or Spectrem 2* Silicone Sealant to a wide range of substrates to provide a watertight seal.

**Spectrem 1 is the recommended silicone sealant to be used; Spectrem 2 may be suitable for use, adhesion to the existing substrate must be confirmed. Contact Technical Services for a recommendation on the specific Spectrem Silicone Sealant to use for your application.*

BASIC USES

Spectrem Simple Seal is designed for both new construction and restoration work involving window perimeter, EIFS joints, parapet walls, skylights, aluminum window seals, transition seals, curtain wall joints, sheet metal roof joints, and other lap joints.

FEATURES & BENEFITS

Spectrem Simple Seal is an easy-to-install silicone extrusion. It offers a cost effective alternative to cutting out existing failed sealant when doing restorative work. Simple Seal is well suited for soft and sensitive substrates such as EIFS.

- High flexibility and movement capability
- High tear resistance
- Color fast formulation
- Wide operational temperature range
- Capable of sealing high movement joints

Simple Seal is a non-corrosive and corrosion resistant material. Additionally, it has been formulated to be resistant to UV exposure and weathering.
