

## ***Ecowang, Inc.***

### ***Statement of Qualifications***

Ecowang is a woman and minority owned business providing ecological and engineering services and solutions for communities, companies, agencies and non-profits in a wide range of disciplines. We are experienced in producing complex environmental analyses under NEPA, CEQA and other federal, state and local regulatory requirements. We conduct wetland delineations, use GIS for mapping and hydrologic network analysis, water supply planning, reservoir and distribution models, and have developed competencies in managing projects for an array of field sampling and monitoring needs within critical aquatic ecosystems and watersheds.

Past clients include mining and oil and gas developers, local and regional government, water conservation districts, non-profits and multi-lateral development banks. Our regional focus is the arid western United States, particularly California, Nevada and Utah, and our international experience includes projects for agencies such as the US Agency for International Development (USAID), United Nations Development Program (UNDP), Global Environment Facility (GEF), Asian Development Bank (ADB) and non-governmental organizations in China, Russia, Mongolia, Ukraine, Nepal, Guinea, Haiti and the Dominican Republic.

### **Services**

- NEPA/Environmental studies
- CWA Section 401/404 permits (stream alteration, dredge and fill)
- Wetland delineations/ studies
- GIS mapping and analysis
- Flood Control/ Mapping
- Conveyance/Storage Structures
- Stormwater Management
- Best Management Practices – Erosion Control, Water Management
- Watershed Management Planning
- Water Supply Planning
- Water Rights Studies / Transfers
- Hydrologic/Hydraulic Modeling
- Water Quality Modeling
- Field Sampling and Analysis
- Irrigation District Mapping
- Database Development
- HAZWOPER 40 Hour Wastesite Worker Certification
- Emergency Response to Hazardous Materials Incidents
- OSHA Outreach Instruction for Construction and General Industry
- Environmental site assessment
- Emergency Planning and Management
- Regulatory/Permitting
- Community outreach and engagement
