

Binoculars Craft

Supplies:

2 Toilet Paper Rolls, Crayons, Scissors, Paper, Crayons, Scissors, Glue, String or yarn

Instructions:

Cut two paper rectangles, the size of the rectangle below.

You can use colored paper or you can color your paper yourself with crayons.

Wrap the paper around the toilet paper rolls and glue them on.

Glue the two wrapped toilet paper rolls together, side by side. Paper clip together while the glue dries.

Poke one hole on the outside end of each toilet paper roll.

Cut your string or yarn long enough so the string will wrap around your head to hold your binoculars.

Pull the string or yarn through one of the holes, through the outside into the inside of one of the toilet paper rolls. Tie a knot on the inside so it will stay in place.

Tie the other end of the string or yarn in the hole on the other toilet paper roll and tie on the inside.

Now you have a pair of binoculars!
