

## EARN A COOL TEN PERCENT (10%) PROFIT ON YOUR INVESTMENT EVERY FORTY FIVE (45) DAYS

### How Does This Work:

This is all about a wonderful partnership between you and us where our experts undertake Derivatives Trading on your behalf. Derivatives are financial contracts whose value is derived from underlying assets. Options, along with futures contracts and forward contracts, are some of the most common types of derivatives. The most common underlying assets for derivatives are stocks, bonds, commodities, currencies, interest rates, and market indexes. These assets are commonly purchased through brokerages. Derivatives can trade over-the-counter (OTC) or on an exchange. OTC derivatives constitute a greater proportion of the derivatives market. OTC-traded derivatives, generally have a greater possibility of counterparty risk. Counterparty risk is the danger that one of the parties involved in the transaction might default. These parties trade between two private parties and are unregulated. On the other hand, derivatives that are exchange-traded are standardized and more heavily regulated.

Our experts have studied and then researched the assets they intend to trade in, current market trends, economic data, government policies affecting prices and markets, prevailing investment sentiment, promoter company background as well as their performance track records, etc. in greatest detail possible. They also identify where your risks and your potential gains lie. Our experts have deep knowledge of market history and what one can expect from different types of assets. The best part is

[www.subcontractsindia.com](http://www.subcontractsindia.com)

that you are always in complete control of your money. Payments are made only against assets acquired by the experts on your behalf. Think of them as an extra set of eyes to keep a lookout for your best interests.

We understand the value of your hard earned money. It might be your life savings or the life savings you inherited from someone else. Your assets could easily represent many times your income, which is a lot of money. Do you really want to risk doing it yourself? Or would it be helpful to have access to someone who does this full time and who does this professionally? We make sure we cover your risks. This works almost like an Insurance.

### Our experts are seasoned professionals equipped with:

**Knowledge:** They have exceptionally strong research and analytical skills. Backed by emerging technologies in the financial sector, they are a formidable team scrutinizing and analyzing every opportunity as well as adversity the market offers.

**Experience:** Investing isn't a science, it is an art. Professionals are constantly learning and growing with advances in technology such as Block Chain, Big Data, Cloud Computing, and numerous analytic tools. Our experts have spent long years in the market and have headed brokerages as well as asset management companies.

**Market Strategy:** Knowing where to invest and when to invest is as important as knowing when to exit. They challenge questionable financial decisions that increase your risk. Covering risks and taking well calculated risks in the derivatives trading business is best left to the experts.

**Temperament:** Our experts do NOT run with the herd. Like a fireman who runs into a burning building when it is on fire, our experts lean into adversity. They have the ability and the track record to go against the grain. This is a very important quality to be able to do what is in your best interest.

## What you Need:

- A Savings Bank Account
- A DMAT account
- A Trading Account
- Minimum Rupees Ten (10) Lakhs as trading capital in your account. No Upper limit
- PAN
