

MARTIN F-CRUSHER CLOSING WHEELS

F CRUSHER DUAL

BOLT ON CLOSING WHEEL (GREASABLE HUB)

\$ 185 SALE
"WHILE STOCK LAST"

Lightweight (9.5lbs) cast fCrusher Closing Wheel. Tapered tooth design allows firming on one side and crumbling on the other.

Drafted tooth keeps its entire foot print on the ground.

No more wearing one side of plastic until it has to be flipped.

Long life ductile cast iron will run for years and years.

Heavy Duty with 6 lip seal design out lasts competitive products by years.

GREAT FOR COVER CROP PLANTING!

Martin-Till

MARTIN SPADING WHEELS

The Spading-Closing Wheel moves soil toward the seed at planting depth, while lifting and fracturing the surface layer to achieve compaction-free closing of the seed trench in wet, hard or sod conditions. With soil firmed around the seed from each side and the surface layer loosened, crops emerge sooner and planting can be done at the proper depth, even in wetter conditions, without fear of crushing the soil above the seed which would prevent emergence.

ZIPPER/ MOHAWK CLOSING WHEEL

COMPACTION REDUCING CLOSING WHEELS

KEY BENEFITS:

**CAST WHEEL
DESIGN WITH
THE NARROW
BAND WILL
MINIMIZE SOIL
BUILDUP
INBETWEEN
SPIKES!**

- Moves Soil with Minimum Compaction
- Designed To Break Up Soil Without Being Too Aggressive
- **1" SPIKES WON'T GET TOO CLOSE TO THE SEED**
- Angle Design Doesn't Throw Out Soil
- On Hot Windy Days the Trench Will Not Crack Open
- As the Zipper closes it creates indentations which allow moisture to sink in.
- In Our Field Studies This Wheel Outperformed All Other Closing Wheels.

Over the last THREE years multiple on-farm tests have been conducted comparing the Germinator® closing wheel with its patent pending "inner-rim-shoulder-firmer" to competitors such as Furrow Cruiser and Twister. In every challenge, Germinator® showed the best success at closing the furrow, providing high quality seed-to-soil contact, even emergence; closing down the competition. Germinator® creates a vein of firm soil encasing the seed in perfect soil contact and enhancing the soil's ability to wick moisture to nourish and germinate the seed.

Copperhead AG's Furrow Cruiser planter closing wheels have solved the sidewall compaction problem that came with the development of the double-disk opening system on all modern planters. The Furrow Cruiser planter closing wheels combine a wide wheel with spiked teeth to provide simultaneous firming and crumbling on both sides of the seed trench. This innovative design is also optimized to clean out well, ensuring that the planter can continue to run even in oversaturated soil.

YETTER TWISTER CLOSING WHEELS

Achieve seed trench closure and break up sidewall compaction with the 6200 Twister Closing Wheel. A rounded center-ring design maintains the depth of the twisted spikes and makes it effective in a wide range of soil conditions. The Twister Closing Wheel works in wide range of tillage practices: minimum till, conventional, strip-till, vertical tillage, and no-till.

Features:

- Wheel utilizes twisted poly spike and rounded center
- Closes the disc opening in both wet and ideal conditions
- Ring design maintains wheel depth
- Available with full wheel assembly or as ring-only insert option for installation of factory wheels
- Made with ultra-high molecular weight (UHMW) plastic material
- Enhances seed-to-soil contact and helps prevent yield-robbing air pockets
- Eliminates potential for sidewall compaction
- 16 teeth per wheel

SPECS

- Outer wheel diameter: 14"
- Rounded ring diameter: 11 1/2"
- Weight: 8.35 lbs. per set (complete wheel assembly)
- Weight: 2.2 lbs. per set (Poly ring-only insert)
