## Welcome to our 5th CFB Preview

As many of you know we've been doing weekly CFB/NFL newsletters for several years. We've always had an interest in doing a CFB preview but the timing hasn't always worked. Four years ago, we decided to start the process of putting it all our data/info together in a preview.

While many previews write far more words on each team, if we're talking pure CFB gambling content, no other CFB preview has as many bets, lines, data and betting specific info on the market today!

This year we have more than \$75,000 in bets so far. That is actually significantly lower than the past couple of seasons for a variety of reasons. Number one, the markets have gotten better. Specifically, we thought Week 1 was much "sharper" than past years. Number two, some markets have been very slow to release this year, specifically the "Game of Year" market. Number three, it is tough to get down at a lot of books. Just yesterday, we tried to make a few "Game of Year" bets and one book limited us to \$129. We tried to make a Heisman bet at another book were limited to .38. Yes, you read that right...38 CENTS on Heisman future. Check out pages 41 and 42 to see what we have bet already. We plan on adding many more in the next month!

Keep in mind, this year's newsletter will have write-ups on all CFB and NFL games plus data info like logs and power ratings and all the opening bets we made at Circa/Fan Duel. However, it will not have best bets. Those are VIP only.

With each passing year, we have more influence on markets and if getting the absolute best number is important to you, VIP might be worth your while this season. It is \$499. You will receive the picks via email and telegram. You can sign up today at [bradpowerssports.com](http://bradpowerssports.com). If you want to learn more about the differences between our weekly newsletter vs VIP service, refer to page 2 or email [brad@bradpowerssports.com](mailto:brad@bradpowerssports.com)

We hope you enjoy this CFB preview and we look forward to a successful 2025 football season.

Sincerely,

Brad Powers and Staff

## Texas Ranks No. 1 in 247Sports 2025 Team Composite Recruiting Rankings

BP Sports used to do an average of all the major recruiting service rankings to come up with our own rankings. However, the 247Sports Composite rankings already does that for us. It is a proprietary algorithm that compiles recruiting rankings and ratings listed in the public domain by the major media recruiting services (ESPN, Rivals, 247, On3, etc) creating the industry's most comprehensive and unbiased prospect and team rankings. (Total = # of signees, 5★ = # of star-rated signees, etc).

# LSU Ranks No. 1 in 247Sports 2025 Transfer Portal Rankings

The transfer portal is becoming more and more prominent in CFB with each passing season. This year already more than 3,000 players have transferred to a FBS school. Following the portal is just as important, if not more, than recruiting at this point because we are talking about players with CFB experience and can be instant impact players. Below is a list of the 247 transfer portal rankings per school.

## Bill Connolly's Returning Production vs Phil Steele's Experience Chart

Returning starters are just a basic approach to analyzing what a team brings back experience wise. Bill Connelly's returning production formula looks at the most predictive key personnel stats -- the numbers that have the most impact on improvement or regression from season to season. For example, what percentage of your QBs' combined passing yardage is returning? Your offensive line snaps? Your defensive tackles for loss? Meanwhile, Phil Steele's experience chart also takes a more thorough approach including the % of yards and tackles returning along with offensive line career starts. **BC column = Bill Connelly's Returning Production Rank. WE column = Winning Edge Returning Production Rank. PS column = Phil Steele's Experience Chart Rank. Rk column = average of the three.**

# 2025 Position-By-Position "Up/Downs" for all 136 FBS teams!

Since we don't handicap baseball, the summer months give us ample time to go through all 136 FBS teams team with a fine tooth comb for the upcoming college football season.

One of the methods we use in coming up with some initial power ratings for each team are our position-by-position "Up/Downs." Basically, we go through every position of every team and give a value of "-3 to +3" for QBs, RBs, WR/TE, OL, DL, LBs, DBs, Special Teams, Coaches and Intangibles.

A team with a "+3" for a single position means that we have that position power-rated up 3 points from the previous season. A good example for this year would be Southern Miss' QB room. Last year Southern Miss had three different starting quarterbacks. Those QB's combined to complete just 52% of their passes with a horrific 7-to-17 TD-to-INT ratio. They became only the 2nd team in the last five years to have 10 more INT's than TD's. This year they bring in Marshall transfer Braylon Braxton who obviously knows new head coach Charles Huff's offense after having a sensational 19-to-2 TD-to-INT ratio last year while adding 610 rushing yards.

A team with a "-3" for a single position means that we have that position power-rated down three points from the previous season. A good example for this year would be Utah State's offensive line room. Last the Aggies returned all five starters and ran for 199 rushing ypg allowing just 20 sacks. This year, they lose all 5 starters and only have 10 career starts.

With 10 different categories, the maximum value a team can be up or down from the previous season is 30. That +30 or -30 points rarely, if ever, happens

and the only example we can give you in the last 10 years of a team being nearly 4 TD's different (power ratings wise) from the previous season is UCF in 2015. The Knights went 0-12 (-24 ppg) in 2015 following a 9-4 season where they were +9 ppg. We had them power-rated 27 points lower by the end of the season. The next closest was Louisville who went from 8-5 in 2017 (+11 ppg) to 2-10 (-24 ppg) in 2018. We had them power-rated down about 24 points from the beginning of the season.

Below are our "Up/Downs" for every position on every team. For the coach's category (CCH), new coaches can sometimes be downgraded because they are new to that program and don't know the strengths and weaknesses of the players yet. Also they could be installing new schemes on offense and/or defense and the current players might not fit their styles of play.

Finally, the intangibles category covers a broad range of categories including Close Wins/Losses from the previous year, Strength of Schedule (is it weaker or stronger from last year?), Turnovers, Injuries (were they healthy or banged up last year), etc. A team like Marshall was graded "-2.5" in that category because they were +10 in TO's, were 4-1 in games decided by one score and play a tougher schedule this year.

As you can see Southern Miss has the highest "plus" grade coming off a 1-11 season. New head coach Charles Huff welcomes 20 transfers from his Sun Belt Champion Marshall team. Speaking of Marshall, they are at the bottom of this chart as the Thundering Herd only return three starters from last year's 10-3 team. New head coach Tony Gibson welcomes in 70 new players but not many of them have starting experience.

## 2025 Season Win Total Projections (Power Ratings Only)

In order to come up with a season win total projection, we take the projected spread of each game and figure out a win percentage chance for that game. If you have a 90% chance to win a game, you get credit for 0.9 of a win. If you have a 20% chance to win a game, you get credit for 0.2 of a win. When you add up the win percentages for all 12 games, you get an early season win total projection.

Below is an example for Ohio State this year. The Buckeyes will be favored in all 12 games this year by an average of 21.6 ppg. Does that mean Ohio State's season win total should be 12? Not when you do the correct math as you get a season win total of 10.10 for the Buckeyes

# Point Spread Value of All 136 Starting Quarterbacks in CFB

One of the questions we get asked often in our media appearances is “how much is a player worth to a Vegas point spread? Obviously, the quarterback position is by far the most valuable position in football and the only position that will move the needle consistently. Very few non-QB’s can move a point spread more than a point in CFB. In all of our years of handicapping and betting, we’ve never come across a person or service that has listed the point value for all 136 CFB QB’s. Below is our preliminary list of what each starting QB is worth to a point spread in CFB. Remember, there are two parts to this: One is the quality of your starter and two is the quality of your backup. Some might be surprised that LSU QB Garrett Nussmeier is worth only 3 points to the spread despite being one of the Heisman favorites. Remember, his backup Michael Van Buren was a 4-star recruit that started 8 games at Mississippi State last year as a true freshman. He is arguably the best backup QB in the country.

## Homefield Advantage for all 136 College Football Teams in 2025

One of the questions we get asked often in our media appearances is “how much is homefield advantage worth in college football? The answer used to be around 3 points. However, if recent years homefield has not meant nearly as much as it did 20 years ago. You could make a case that homefield is arguably closer to 2 or 2.5 points now as compared to 3.5 or 4 points in 2000. Below is our homefield numbers for every college football team and also a comparison to what we used last year. Notice there are some subtleties to the numbers. So if you’re wondering how a team like Wyoming can have the same homefield advantage as a team like Nebraska, note that Wyoming plays in 7,200 feet of elevation which is unique with or without fans. Alabama has a 4-point homefield advantages (best in CFB) as the Tide are 65-3 at home the last 10 years while covering 60.0% of those games. Meanwhile Akron and Massachusetts both have a 1.25-point homefield advantages (least in CFB).

# CFB Season Win Totals at Fan Duel with Brad Powers' Numbers

Notes: The Open # column = opening season win number in January. The Open + Vig column = the opening number plus the vigorish. That means if the season win total opened at 6.5 with the normal -110 vigorish, it would be 6.5. However, if the season win total was 6.5 but the OVER was -120, the + Vig # would = 6.6. If the OVER was -130, the + Vig # would = 6.7. Similarly, if the season win total was 6.5 and the UNDER was -120, the + Vig # would = 6.4. -130 would equal 6.3, etc.

The Current columns = the current numbers as of July 23rd. The BP column is what we make the season win total.

## Week 1 Computer Projected Lines for Every CFB Game

For the past eight seasons we have posted computer projected lines for every game on Wednesday. **Games where there was of difference of more than 3 points saw our computer lines actually beat the Vegas line at a 506-441-14 (53.4%) clip!** That's pretty solid and actually better than our own handicapping in some seasons. Keep in mind, these computer lines don't take into consideration off-the-field factors like revenge or flat spots or if there are late-week injuries. They are basically a power-rating number difference between the two teams that also takes into consideration the home field advantage.

Of the 6 games where our computer is off more than 3 points compared to the Vegas line (highlighted), our favorite team this week to back would be **Tennessee -12.5**.

The Comp column is the computer projected line and the Diff column is the difference between the Vegas line and the Computer line. "+" numbers in the difference column say back the underdog. "-" numbers in the difference column say back the favorite. Let us know if you have questions.

## Betting CFB Openers

Every Sunday in Vegas at 11am PT, Circa Sports is one of the first books in the world to release CFB lines and we bet them every week. We think it's the best value bets we make all week. 2020 was the first season where we tracked every single bet we made and posted them in the weekly newsletters. We were very pleased with our 119-76-3 (61%) record on these Sunday bets with an average line value of 2.6 ppg! In 2021, we were 224-196-5 (53.3%) vs the Circa openers with an average line value of 1.8 ppg. In 2022, we were 314-262-14 (54.5%, CLV 417-122-51 +1.65 ppg). In 2023, we were 405-358-6 (53.4%, CLV 577-137-55 +2.09 ppg). Week 1 lines came out in May for all the FBS vs FBS games. Below is some of what we bet already. As of now we've gotten the best of the line on all of our bets by an average of 2.0 ppg.

11/29	at Oklahoma	+0.8	49%
<b>Season Win</b>		<b>8.23</b>	

**Early Bets/Notes:** LSU went "all-in" on the transfer portal (No. 1). The opener at Clemson looms large as the Tigers have lost 5 straight season openers.

## #11 Texas A&M

11/29	at Texas	+10.4	26%

**Season Win 8.07**

**Early Bets/Notes:** We think A&M will be much improved this year. The problem is they play three Top 10 teams on the road and may have a similar record.

## #12 Florida

11/29	Florida State	-13.8	83%

**Season Win 7.45**

**Early Bets/Notes:** The Gators closed strong a year ago and are even better this year. The problem remains a schedule that sees them play 7 Top 20 teams.

## #13 Tennessee

11/22	at Florida	+3.4	41%
11/29	Vanderbilt	-13.2	82%

**Season Win 8.59**

**Early Bets/Notes:** The loss of QB Nico has lowered expectations but the Vols play one of the easier SEC schedules and should be favored in 9 games.

## #14 Oklahoma

11/29	LSU	-0.8	52%

**Season Win 7.47**

**Early Bets/Notes:** OU has the most improved offense in the country. The problem is a schedule that will see them play eight teams in our preseason Top 20.

## #16 Ole Miss

**Early Bets/Notes:** This year's Vandy team is better than last year thanks to the return of 14 starters. The problem is the Dores won't be sneaking up on anyone.
