Liver Guard Plus

Clinical Applications

- Supports Healthy Liver Function*

Liver Guard Plus is formulated to help support and improve liver function, reduce elevated liver enzymes, and reduce fibrotic tissue damage generated by various liver conditions.

All Adaptogen Research Formulas Meet or Exceed cGMP Quality

Discussion

Liver Guard Plus is a synergistic formula designed to support healthy liver function. Although the brain typically gets credit for orchestrating everything that goes on in the body, the liver is another organ that is tasked with a wide range of metabolic and biochemical tasks that affect overall health.

If liver function is compromised in some way, these critical tasks may not occur optimally. Many things interfere with healthy liver function, such as excessive alcohol consumption, inflammation, the buildup of fats in the liver, scarring of liver tissue from a number of illnesses, including hepatitis and other viruses, and overuse of medications that affect the liver, such as acetaminophen.

Among the many functions the liver performs are:

- Regulating blood sugar
- Producing and recycling cholesterol and other lipids
- Synthesizing bile (to aid in proper digestion of dietary fats) • Detoxifying compounds from the outside (such as heavy metals, pharmaceutical drugs, and caffeine) as well as normal byproducts of healthy metabolic processes (excess hormones, urea)
- Generating important blood proteins, such as albumin and clotting factors
- Storing fat-soluble vitamins

Liver Guard Plus consists of a blend of **botanical and mushroom extracts, along with N-Acetyl-LCysteine (NAC)**, a derivative of the amino acid cysteine, which has powerful antioxidant and liver protective actions. In addition to protecting the body from oxidative stress, NAC assists with the formation of glutathione, often called the body's "master antioxidant," and a crucial compound for effective detoxification in the liver.

Many factors may contribute to reduced glutathione levels in the body, **such as:-**

- Stress
- Poor Diet
- Excessive Exercise with insufficient rest and recovery
- Toxin Exposure, and Certain Medications

NAC acts as a precursor to glutathione and may help support the body in producing adequate levels of this powerful compound.

The mushroom extracts and herbal ingredients in this product are designed to protect liver cells against oxidative damage which may affect the function of the liver. The ingredients also actively contribute to detoxification processes in the liver by supplying nutrients that may enhance the biochemical reactions involved in neutralizing harmful substances.

This product is not intended to diagnose, treat, cure, or prevent any disease.**

Liver Guard Plus may be beneficial for:

- Hepatitis*
- Cirrhosis*
- Liver fibrosis*
- Non-alcoholic fatty liver disease*
- Elevated liver enzymes*

Recommended Use: As a dietary supplement, take four capsules per day, or as directed by your health care practitioner.

Supplement Facts			
Serving Size 4 capsules			
Servings Per Container 30			
Amount Per Serving	% Daily Value	Amount Per Serving	% Daily Value
N-Acetyl-L-Cysteine	600 mg *	Milk Thistle (<i>Silybum marianum</i>)(seed)	500 mg *
		[standardized to contain 80% silymarin]	
Reishi Full Spectrum (<i>Ganoderma lucidum, Ganoderma applanatum</i>) (mycelium, fruiting body, primordia, spores and extracellular compounds)	500 mg *	Chinese Skullcap Extract (<i>Scutellaria baicalensis</i>)(root)	300 mg *
		[standardized to contain 30% flavones]	
Cordyceps (as CordycepsPrime™) (<i>Cordyceps sinensis</i>)(mycelium) [standardized to contain 8% cordycepic acid and 0.28% adenosine] (from soy)	500 mg *	Schisandra Extract (<i>Schisandra chinensis</i>) (fruit)	250 mg *
		Burdock Extract (<i>Arcium lappa</i>) (root)	250 mg *
		*Daily Value not established.	

Other Ingredients: Cellulose (capsule), vegetable stearate.

Suggested Use

As a dietary supplement, take four capsules per day, or as directed by your health care practitioner

Caution

Keep out of reach of children.
