6mm. HD SICKLE FOR MAC DON

Many Growers who own a Mac Don Draper head have been commenting through the years about excessive bolt breakage on their sickle. Through our research we have found some common results. The speed of the sickle needing to run at 600-650 rpms to maintain desired ground speed, adds additional stress to the 12-24 bolts used for the sections.

Upon further research we found that most manufacturers that run these sickle speeds usually run heavier section bolts on the sickle.

We at R.E. Skillings Supplies Inc. have come up with a sensible solution for the bolt issue.

The **SKILLKUT™** Sickle

Benefits of Our Sickle:

- 6mm. (Heavy Duty) Diameter ELIPTICAL Section Bolts instead of 12-24 bolts.
- Choice of section available: Tough cut (3 TPI), **SKILLKUT** (5.3 TPI) , or the Super Seven
- (7 TPI) standard section.

SICKLE CONVERSION KIT

EASY CUT II
by SCHUMACHER.

Easy Cut II kits are available for almost all types of combines and headers.

- One sectionalized knife assembly
- Roller guides (where possible, otherwise wear plates)
- All hardware

The one up, one down section mounting on the knife and various options of section serrations provides for optimal cutting performance in a variety of crops.

Because the knife is trapped in the Easy Cut guard, no hold downs or wear plates are required, eliminating time consuming adjustments: a source of trouble and costly replacements. Also the knife can't "buckle" and break between hold downs.

Maintenance of the Easy Cut II system:

Because only a few different parts are used, most parts are common for many platforms; worn parts are easy to exchange. It takes very little time to check the cutting system periodically for wear. All parts are available through a wide network of dealers especially during harvest. Parts are readily available year-round.

The advantages of the SCH Easy Cut II system:

- Extremely low maintenance, because no hold downs or wear plates are used, no adjustments necessary
- Very robust system, especially when used in wide platforms
- Superior cutting, even in the most difficult conditions
- Modular design

POLY FINGERS FOR GRAIN HEAD REELS

With over 6 million, patented **"GENTLE FINGERS"** in the fields, we're secure in stating we have the best designed nylon reel finger replacement available in the market place today. The patented "T Bar" design allows **"GENTLE FINGERS"** to bend uniformly from point of contact to the point of attachment, thereby eliminating a weak spot where the finger could bend again and again, and in time, break off during use.

"GENTLE FINGERS" come complete with hardware & mounting instructions:
