

# Email Archiving

CIO Dynamics Email Archiving helps preserve information, facilitate compliance, and speeds eDiscovery with a service that's fast, scalable and secure.

*Email Archiving can prevent average business cost increases of*

# \$369,000

**Are you protected** if your a employee deletes a critical email, a competitor challenges a claim, or someone steals your intellectual property?

## Email Archiving reduces the costs of:

- Preventing downtime
- Backing up and storing your emails
- Restoring lost emails and validating information
- Preserving intellectual property

# Example: Reducing Business Costs

**Problem:** Employee accidentally deletes important email or computer hard drive crashes

**Solution:** Simple, affordable, scalable email archiving with fast, self-service email search and restore

## Benefits:

- **For the business:** Cost avoidance, data preservation, improved productivity, predictable OPEX expenses
- **For IT:** Reduced recovery, downtime, storage, backup, complexity and costs

*Email Archiving can prevent average compliance costs of:*

# \$396,000

Are you regulated by PCI, SEC, GLBA, HIPAA, HITECH, SOX, or other agencies / guidelines? **Will you fail** an audit or accidentally expose a customer's credit card data?

**Email Archiving cuts the costs of:**

- Responding to compliance audits
- Finding and validating all relevant email data
- Internal preparation

# Example: Mitigating Compliance Risks

**Problem:** If you're audited under PCI-DSS, you need to demonstrate that no customer credit card numbers are stored in unprotected emails.

**Solution:** Email Archiving helps you to comply with PCI-DSS—as well as HIPAA, FINRA, and many other regulatory structures.

## **Benefit:**

- **For the business:** Mitigates the risk (and cost) of failing an audit

*Email Archiving can prevent average legal costs of:*

**\$535,000**

Nearly 90% of all businesses will be sued. **Can you comply** with the Federal Rules of Civil Procedure and deliver all relevant emails within a short window to prevent a fine?

**Email Archiving cuts the costs of:**

- Responding to e-Discovery mandates
- Properly setting legal actions
- Adequate internal preparation

# Example: Lowering Legal Expenses

**Problem:** FRCP guidelines require the delivery of all relevant emails for litigation within 30 days

**Solution:** Email Archiving helps make it simple and affordable to identify and deliver emails in legally admissible formats

## Benefits:

- **For the business:** Avoid FRCP fines and lower the risk of losing lawsuits
- **For IT:** Lower email search & recovery time, complexity, and costs

# Email Archiving

Help preserve information, facilitate compliance, and speed eDiscovery with a service that's fast, scalable and secure.

Email Archiving

**Compliance and more.** Get preservation, protection and restoration features that help safeguard intellectual property, facilitate compliance, and lower eDiscovery costs.

**Plan flexibility.** Unlike other providers, you can add Email Archiving to all mailboxes or just specific ones. Email Archiving is easy to set up, use and manage

**A Worry-Free Experience™** . Free 24/7 phone support and the highest levels of security and reliability keep you focused on doing business, not worrying about email.

**Full integration.** You can provision and manage Email Archiving directly from your control panel.

# 100%

*data capture across all devices*

- Capture of mail sent or received, on virtually any device
- Platforms include POP/IMAP Email
- Simple to search, filter, tag and recover
- Unlimited storage and scalability
- Encryption in-transit and at-rest
- End-user access
- Centralized control
- One vendor, one bill, one password

# Key Advantages with Email Archiving

1

## **Intuitive, simple Microsoft Outlook® compatible look & feel**

Quickly and accurately retrieve any email, attachment or file

2

## **Perform co-mingled search across any content**

Ensure performance and data visibility to the end user.

3

## **Import legacy data to the intuitive import wizard**

To .pst, .nsf, .eml, .html, .pdf or others. Multiple formats support multiple use cases.

4

## **Start in minutes—not days, weeks or months**

Native journaling—no need for MX redirect or changes to mail systems

5

## **Archive multiple sources (on-prem/hosted) simultaneously**

Supports Office 365, Exchange, Notes, GroupWise, IMail, Scalix, Zimbra, others

# Email Archiving Features

## SCALABLE

- Replicated via 8 data center copies vs. up to 4 for others
- Capture across virtually all devices
- Includes Exchange, IMAP and POP
- Full indexing and extraction of 400+ file types (attachments)
- Unlimited storage capacity
- Linear scalability
- Ultra-fast data ingestion and searching across millions of emails

## SECURE

- Unmatched data resilience
- FIPS-certified AES 256-bit encryption of stored data
- Encryption in transit and at rest
- WORM-compliant media
- Datacenters are SSAE 16 audited, ISO 27001 and PCI compliant, and FISMA Moderate certified
- No co-mingling of data

## SEARCHABLE

- Three different search methods
- Advanced full text search inside emails & attachments
- Identify content with tagging tools
- Implement a “legal hold”
- Search across millions of emails in every mailbox in your account
- Recover messages back to administrator’s mailbox in seconds
- Categorize results before exporting

*“I just found 34,159,000 messages in 4.06 seconds. Wow, everything comes right up—this is really amazing!” --County Government Customer*
