## Is Your Network Up To Speed?

**57% of businesses note their network is only adequately supporting their everyday needs.**

### What do you do about it?

- 1)** The first step is to understand the capabilities and shortcomings of your existing network, this is where ADS can help with a 100% FREE network assessment.
- 2)** Our network assessment identifies equipment that needs to be upgraded, reviews performance issues, and finds any weaknesses in your security structure. Only then you can make an educated business decision of what steps need to be made to optimize your network's performance.
- 3)** We analyze your entire network, identify issues and concerns, document those issues and provide insight into how you might resolve them.

The benefits are clear, our network assessment provides comprehensive documentation for an in-depth understanding of your existing environment.

**Call us today for your no pressure FREE network assessment.**
