

Thanks seems insufficient to express my gratitude. When I left your office I wasn't sure what would happen, but when I laid down in bed that night and there was NO spinning I was elated. As you told me, the Epley maneuver is 90-92% effective if done correctly. I am blessed to say I am now a "statistic". I have not had any spinning since leaving your office. I can lay down, look up and lean over normally. Once again, thank you and may God bless you for caring about people and their unbalance issues.
