

**ARCHERY
TRACIBLE
OF DISTINCTION**

BY

HOTT

FOREWORD

The creation of archery equipment of the highest quality is the basic goal of Hoyt Archery Company. To this end, every effort is turned. Thoughtful planning and careful designing supplemented by precision methods of manufacturing help to achieve this quality in both appearance and performance of the finished product. Thus a new and higher standard is achieved, a standard which produces archery tackle of distinction.

TERMS

Cash with order or C.O.D. All goods shipped f.o.b. St. Louis, Mo.

Prices subject to any additional state or federal taxes that may be levied.

Prices and specifications subject to change without notice.

All goods are sold subject to approval and are returnable within 5 days after receipt, providing goods has not been marred or broken. Return transportation charges must be prepaid.

ORDERING

When ordering give both Catalog number and name of article wanted.

When ordering bows be sure to specify bow length, bow weight and length of draw.

When ordering arrows state length wanted (measured from bottom of nock to the taper of the pile on target arrows and from the bottom of the nock to the base of the blade on hunting arrows) and weight of bow with which they will be used.

Catalog No. 3

THE McQUITTY AIM INDICATOR

"The Scientifically Designed Range Stick"

It is no longer necessary to recalibrate a different range stick for each of your bows or guess at the location of your point of aim in case your bow goes down with the heat. SIMPLY ADJUST THE INDICATOR TO ANY KNOWN POINT OF AIM AND ALL OTHER STANDARD RANGES ARE AUTOMATICALLY INDICATED.

Whenever the initial velocity of your arrow changes, the location of your point of aim is affected considerably more at the longer distances. The RELATIVE effect at 30, 40, 50, 60, 80 and 100 yards has been determined mathematically, thoroughly tested on the range and incorporated in the design of the INDICATOR.

The INDICATOR can be permanently adjusted to your own style of shooting by simply locating the position of the bull's eye sighting ring, or "Gold Ring," instructions for which are included with each INDICATOR.

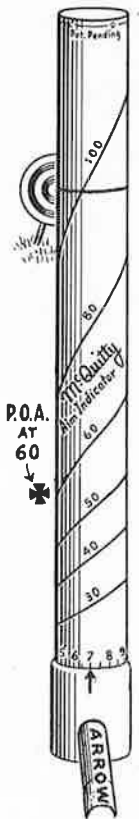

The INDICATOR is furnished in three velocity ranges, each of which will allow for approximately 10 lbs. variation in pull:

- No. 1—For fast to medium bows.....\$1.50
- No. 2—For medium to slow bows
(This range will include most
ladies' bows)\$1.50
- No. 3—For very weak bows.....\$1.50

Following information will assist us in filling your order:

1. Maximum and minimum pull of bows you normally shoot.
2. Method of anchor, i.e. UNDER chin, side of chin, field style, etc.
3. Length of arrow.
4. Mail us your old range stick or replica of same showing relative marks for 40, 50, 60 and gold.

The indicator is constructed of hard wood, neatly printed, size $\frac{3}{4}$ " diameter x $7\frac{3}{4}$ " and can be handily carried in your pocket or tackle box.

BOWS

Custom Made of YEW

OSAGE ORANGE - LEMONWOOD

Hoyt bows of Yew and Osage Orange are custom made from select, thoroughly seasoned wood. They are of correct design, having beautiful flowing lines that blend, in pleasing transition, from deep narrow handle to attractive, laminated nocks. Careful tillering and balancing, with grain carefully followed, insures the ultimate in durability, smoothness of action and speed of cast - - - producing bows of truly distinctive quality.

TARGET

No. BL-100 Deluxe Lemonwood Bow.....\$10.00
For rawhide backing.....\$3.00 extra

ARROWS TARGET - HUNTING - FIELD - ARCHERY GOLF - FLIGHT

Hoyt arrows are made in several grades and types to fill the needs of all archers, the target expert, the hunter and field archer and the novice. The design of each type has been carefully considered and proven by field test. Tapered construction and TRUE spiral fletching—on special machines of our own design—are standard on most grades. Tapered construction aids in smooth arrow performance - - - TRUE spiral fletching (not to be confused with diagonal fletching) insures uniform rotation and, in the case of broadheads, offsets the rudder effect of the blade, thus insuring accurate flight. Careful selection of choice materials, fashioned with precision into the finished product, insures arrows of beauty and accurate performance - - - true requisites for arrows of distinction.

TARGET

TOURNAMENT TARGET ARROWS

Highest quality tournament arrows of precision construction. Custom made of select Port Orford Cedar with genuine two point beefwood footing. Accurate three way matching in spine, balance point and to within five grains in weight. Choice of straight or TRUE spiral fletching, 3 1/2 inch vanes. Equipped with plastic Mid-Nox and brass or steel parallel points. Available in two diameters, 5/16 inch tapered to 9/32 inch and 9/32 inch tapered to 1/4 inch. Beautifully crested or crested to your specifications. In ordering state drawing length and weight of bow.

- No. TC-100 Footed Tournament Arrow.....\$16.00 doz.
No. TC-200 Same as above, not footed..... 10.50 doz.
Prices quoted on barreled or special
arrows upon request.

MATCHED TARGET ARROWS

Select Port Orford Cedar arrow, two point footed with beefwood. Fitted with plastic nocks and points, TRUE spiral fletching, attractively crested. Shafts are tapered and matched within 15 grains. Produced in two sizes, 5/16 inch and 9/32 inch. Length 22 inch to 28 inch in one inch graduations. State length desired and weight of bow.

- No. TC-102 Footed Arrow, Matched.....\$9.50 doz.
No. TC-202 Same as above, not footed..... 6.50 doz.

POPULAR PRICED SELF ARROW

A sturdy, well-made arrow of Port Orford Cedar. Extremely accurate and well fletched. Plastic points and nocks, stock crested. 22 inch to 28 inch in one inch graduations. Sizes, 5/16 inch and 9/32 inch, tapered shafts.

- No. TC-206 Self Cedar Arrow.....\$4.50 doz.

LOW COST ARROW

A good quality Port Orford Cedar arrow built to meet the demand for an inexpensive arrow. Superior to birch. Well suited for camps, commercial ranges etc. Nicely fletched and crested. Plastic nocks and points. Lengths 22, 24, 26 and 28 inches.

- No. TC-208 Low Cost Cedar Arrow.....\$3.00 doz.

HUNTING and FIELD

MATCHED BROADHEAD ARROWS

An accurate, well balanced broadhead arrow. Absolutely will not plane in flight. Made of highest quality Port Orford Cedar, matched within 10 grains in weight and very closely for spine. TRUE spiral fletching with long low feathers. Equipped with cock feather indicator, Mid-Nox, Case Korrek blade 1 1/16" x 2". Attractively crested. Available in either self or beefwood footed shafts of tapered construction. Sizes: self, 5/16, 11/32 and 3/8 inch; footed, 5/16 and 11/32 inch. In ordering, give bow weight and length desired from bottom of nock to base of blade.

- No. FC-100 Footed Broadhead Arrow.....\$15.00 doz.
No. FC-200 Self Broadhead Arrow..... 12.00 doz.

MATCHED FIELD ARROWS

This arrow is the same as the broadhead arrows except for the point which may be had in either blunt or target piles. The blunt is suitable for roving or small game hunting, the piles for target practice or the N.F.A.A. round. Specify bow weight, draw length and type of point when ordering.

- No. FC-102 Footed Field Arrow.....\$13.00 doz.
No. FC-202 Self Field Arrow..... 10.00 doz.

POPULAR PRICED FIELD ARROW

This is our leading and most inexpensive field arrow for roving and small game hunting. Fitted with Plastic nocks, 3 1/2 inch TRUE spiral fletching, blunt or target point and neatly stock crested. Select, straight grained, tapered Port Orford Cedar shafts in 5/16, 11/32 and 3/8 inch sizes and in 24, 25, 26, 27 and 28 inch lengths. State bow weight and drawing length.

- No. FC-204 Self Field Arrow.....\$5.25 doz.

ARROWS

Continued

FISH ARROW

Shaft is of $\frac{3}{8}$ inch cedar, 30 inches long, tapered. Fitted with Mid-Nox and special barbed prong point. Not fletched. Feathers after a few wettings are useless and are not needed since the drag of the line attached to shaft will guide arrow's flight.

No. FC-210 Fish Arrow.....\$1.25 ~~dos.~~

ARCHERY GOLF ARROWS

Made of select cedar, footed with beefwood. Flight arrow is barreled, fletched with small feathers. Approach arrow fitted with special non-skid point. Putting arrow equipped with blunt point and, when ordered in set, matched to approach arrow. All have plastic nocks, stock crested. State length required and bow weight.

ARCHERY ASSOCIATIONS

Today, the sport of archery is well organized in both branches of target archery and field archery. Each is well represented by a strong national association.

The backbone of organized target archery is the National Archery Association (N.A.A.) which has been the activating force in this phase of the sport since its founding in 1878. The N.A.A. has done much toward the promotion of archery here in America and to the N.A.A. belongs much of the credit for the ever expanding growth and the present popularity of the sport.

Of more recent origin is the National Field Archery Association (N.F.A.A.) which sponsors the field and hunting branch of the sport. Although formed in 1938, the N.F.A.A. has had a very rapid growth and has added great impetus to the popularity of hunting with the bow, having been a great factor in effecting special hunting privileges for the benefit of the bowman hunter throughout the country.

Membership in either or both of these organizations are of benefit to both you and to the sport as a whole. Through them you will learn about shooting technique, target and hunting tackle, how to organize a club. And they will bring you in contact with national and local archers and clubs and good hunting stories. On the other hand, a strong association will result in a strong sport with better recognition. With each yearly dues a year's subscription to one of the archery publications is given. Membership may be had by writing the following associations secretaries:

Louis C. Smith, secretary N.A.A., 77 Franklin Street, Boston, Mass. Dues are \$2.00 a year which includes a year's subscription to the American Bowman-Review.

John L. Yount, secretary N.F.A.A., P. O. Box 383, Redlands, Calif. Dues are \$1.50 per year and includes a year's subscription to Archery.

ARCHERY PUBLICATIONS

AMERICAN BOWMAN-REVIEW, Albany, Oregon, \$1.00 per year.
Official Publication of the N.A.A.

ARCHERY (formerly Ye Sylvan Archer), 121 N. Broadway, Los Angeles 12, Calif. Official Publication of the N.F.A.A.
\$1.50 per year.
