The F-35 Lightning II is the world's only multi-role stealth fighter. It is being purchased in larger quantities to replace 4th Generation Fighters that have run out of service life. The US Government is allowing our closest allies and partners to purchase these state-of-the-art fighters. Israel, as our closest ally in the Middle East, is currently flying F-35s. Our briefing will be on the current status of those Israeli fighters along with an update on the F-35 program as a whole.
