

Certification Levels

Participants in our instructional opportunities often take a variety of classes according to their interest in given areas of photography. This is not only appropriate but a great way to grow ones skills in an area of interest. A second step though to the learning process is gaining a broader perspective on all areas of photography and in the particular skills and camera functions that are used in a given area. In order to set some goals for students who want to broaden their knowledge and skills, we have created Certification Levels. These certificates recognize that a student who participates in the prescribed classes has learned a variety of techniques, camera operational skills and is overall better prepared to capture all kinds of photographic subjects.

Below is a list of these Certification Levels with the specific classes that would need to be taken to meet the requirements. When each level is completed, the student receives a Certificate of Achievement to recognize not only their accomplishment but to acknowledge a positive direction in the learning process. In addition, each certificate will also come with a \$60 learning credit for future classes, trips or individual instruction.

Another benefit of gaining certifications is that they are a necessary element of becoming an Intern with our photography company, The Professional Photography Group (www.TheProPhotoGroup.com). Any student completing Level 1 is invited to be considered for our 6 month Internship program.

Level 1 Certification

- Digital Photography Bootcamp
- Flash 1
- Sports 1
- Composition 1
