16 January 2015

Dear Lori and Charles;

My wife and I are pleased to provide you a reference for the work that you accomplished at our home in Glen Allen.

We had been looking into adding solar power to our home for a few years and when we decided to make the move, we asked Off Grid by Design for an assessment. We didn't know that that wasn't all that we were asking for. We not only received a complete assessment including all the options we were considering and more, we also received a complete home assessment including easily achievable energy saving measures, and your help didn't stop there. The team installing the system contacted the neighbors to make them aware of any possible disruptions and no corners were cut on the installation. It was as if we were family. Installation site problems were handled professionally, and we were updated continuously. So, with all that, we should not have been surprised when you were of tremendous help when a warranty issue came up with the manufacturer. Your team at Off Grid by Design really are concerned about us as partners in renewable energy and energy conservation.

Thank you again.
