

Custom Rodding & Basic Hardware

2025 Price Guide

MADE JUST FOR YOU

CUSTOM RODDING: FOR THE DETAIL OBSESSED

Built to suit your exact specifications.

Design solutions solved with
multiple configuration options.

Assembled with care by expert hands
for absolute perfection.

We take great care to review each unique order we receive before we construct individual rods by hand. From decorative to basic, functional to practical, we have a large range of configurations that will suit any of your projects. Our custom rods are the answer to all of your drapery hardware problems.

AMP™ Motorization

Why AMP™?

The slim design of the quiet, yet powerful motor and the position on the track allows the motor to tuck seamlessly behind your drapery panel so you'll never have to sacrifice your style or comfort. For safety measures, you're able to move the draperies with a gentle tug, allowing for operation when a remote is not present or if a guest is unaware of the motorization feature. The dual battery and AC power sources allows operation in case of a power outage so draperies may be opened in the event of an emergency. AMP™ Motorization is available on our most popular traversing tracks, Estate and Architrac® Series 94001 and in drapery header styles Ripplefold™ and pleated for a variety of styling options. This is comfortable living at its finest.

For AMP™ Motorization brochure, programming instructions and installation instructions, please visit the drapery hardware resource library at kirsch.com.

Benefits & Features

AMP™ Motorization

- Motor mounts to the back of the track which allows a seamless look between motorized and manual traverse rods
- Drapery fabrication does not need to change between manually controlled draperies and motorized draperies; No additional returns or any special instructions
- Limits are set automatically after installation
- Remote control is radio frequency and easily pairs with the motor
- Tug feature; when drapery is pulled the motor will traverse the drapery
- AMP™ App with AMP™ USB Bridge
- Architrac® Series 94001 Rods with AMP™ cannot be bent or curved

Frequently Asked Questions

What is the weight capacity?

64 lbs Motor is rated to 64 lbs. Be sure not to exceed the Estate or Architrac track specifications to ensure your motor operates optimally.

Can you double the weight capacity by using two motors?

No Only use one motor per rod.

Does AMP™ offer limit setting?

Yes The motor automatically sets its limits.

Does AMP™ offer touch control?

Yes The tug feature allows you to pull on the drapery and the motor will automatically open or close your draperies.

How long is the power cord?

6 ft The durable, non-extendable power cord is extra long for out of reach places. Any extra can be rolled and secured for a tidy look. Cable extensions are available in 15", 4', 10' and 20' lengths to reach outlets that are farther away from the motor.

Is there a wall switch?

Yes There are Flush Mount and Surface Mount Wall Switches available.

Does AMP™ offer a warranty?

Yes See the Kirsch Warranty document for more information.

Download the AMP™ APP to get started

Max. Track Length Estate™ - 16 ft
Architrac™ 94001 - 16 ft

Max. Load 64 lbs

Follow track specifications for drapery weight.

Bracket Spacing & Mount Options

Place brackets at each end. On the ends where the drapery will stack, place the next bracket at a maximum of 24" from the first bracket, then place remaining brackets at 48" intervals over the remainder of the track. Spacing may need to be shortened for heavier draperies. All mounting options are compatible with our AMP™ Motorization.

Wall Mount using parts:

To achieve this look, order Estate rod, wall mount and all components will be included.

Why Estate™ Traverse Rods

The Estate™ Traverse Rod Collections are the flagship of the Kirsch® Decorative Drapery Hardware product lines. Estate™ rods are decorative, 1⅜ inch or 2 inch traversing drapery rods with wheeled carriers that are designed to carry today's heavier draperies. Having set the interior design standard for decades, each of the Estate™ collections are characterized by inspired finials, premium finishes and precision engineered components.

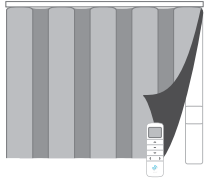

Designer Metals™, Wood Trends™, and Wrought Iron Collections are featured in countless luxury venues and designer homes throughout the world.

Operating Systems

Motorized Draw

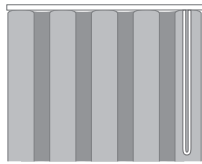

AMP™ Motorization

- Easy to use
- Quiet, powerful motor
- Pleated or Ripplefold™
- For Estate™ Traverse Rods or Architrac® Series 94001
- For more information, see page 8

Manual Draw

Cord Draw

- Easy to use
- Pleated or Ripplefold™

Hand/Baton Draw

- Easy to use
- A gentle tug allows drapery to glide across track
- Pleated or Ripplefold™

Baton Duplex Draw

- Easy to use
- Used on split draw rods
- Pleated or Ripplefold™
- When the baton is pulled on one stack, draperies on both sides of the traverse rod open or close

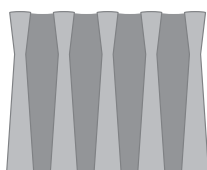

Header Styles

Ripplefold™

- Panels can be pressed flat, yet fall into fold
- No hooks or pins
- Headings are suspended under track
- Stack back is less than conventional pleated draperies
- Draperies snap on/off carriers for easy installation
- Interior drapery appearance is identical to exterior-facing appearance

Pleated

- A classic header option
- Can be used with most track systems using slip-in or pin-on hooks
- Headings can be suspended under the track or over the face of the track to conceal hardware
- Four carriers per foot is standard, additional carriers or rings can be ordered

Estate™ Overview

To help determine which system is right for your project, use the guideline below to select the best fit. For more detailed information about each track, please visit our resource library at kirsch.com.

Calculating Drapery Weight

1. Fabric Weight

Some fabric samples list on the back of the swatch the weight listed in Ounces/SqYd (ounces per square yard). Call the manufacturer for the weight if not listed.

2. Lining Weight

Most drapery linings are 2oz - 4oz per square yard.

Drapery Weight Formula

Total Square Yards = (total yards x 36 x fabric width) ÷ 1296 (1-square yard)
Weight = total square yards x weight in ounces per SqYd) ÷ 16 oz in lb

Example 32 yards of 54" wide fabric weighing 14 oz/SqYd
Total square yards = (32 x 36 x 54) = 62,208 ÷ 1296 = 48 SqYds
Weight = (48 x 14oz) = 672 ÷ 16 = 42 lbs

Lining Weight Formula

Total Square Yards = (total yards x 36 x fabric width) ÷ 1296 (1-square yard)
Weight = total square yards x weight in ounces per SqYd) ÷ 16 oz in lb

Example 32 yards of 54" wide fabric weighing 6 oz/SqYd
Total square yards = (32 x 36 x 54) = 62,208 ÷ 1296 = 48 SqYds
Weight = (48 x 4oz) = 192 ÷ 16 = 12 lbs

Fabrics by Weight

Contact the fabric manufacturer for your specific fabric weight.

Fabric Type	Weight per Square Yard
Drapery Lining	2-4oz
Interlining	5-6oz
Blackout Lining	6-10oz
Bump Lining	12-14oz
Silks	2-4oz
Chintz	2-4oz
Printed Cottons	4-6oz
Linens	6-10oz
Jacquards	10-14oz
Velvets	14-18oz

Why Architrac®

The Architrac® heading system supports the three most popular drapery heading styles, Ripplefold™, pleated and cubicle. Outstanding functionality for commercial applications, versatile enough for residential applications, Architrac® delivers performance for the most demanding applications. All assembled sets come complete and ready-to-install, and are available in manually traversing systems, or Series 94001 can be upgraded with AMP™ Motorization.

A perfect complement to the Architrac® series, our new K-Rail allows you to use any of our 1 $\frac{3}{8}$ " finials from any of our collections, no matter the material or finish. You now have the ultimate power to customize your design since our K-Rail is designed in finishes that complement all of our collection finishes perfectly. You can finally bring your project to another level of customization.

Operating Systems

Motorized Draw

AMP™ Motorization

- Easy to use
- Quiet, powerful motor
- Pleated or Ripplefold™
- For Estate™ Traverse Rods or Architrac® Series 94001
- For more information, see page 8

Manual Draw

Cord Draw

- Easy to use
- Pleated or Ripplefold™

Hand/Baton Draw

- Easy to use
- A gentle tug allows drapery to glide across track
- Pleated or Ripplefold™

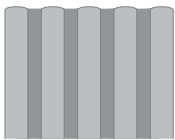

Baton Duplex Draw

- Easy to use
- Used on split draw rods
- Pleated or Ripplefold™
- When the baton is pulled on one stack, draperies on both sides of the traverse rod open or close

Header Styles

Ripplefold

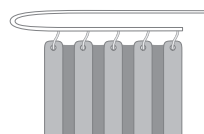

- Panels can be pressed flat, yet fall into fold
- No hooks or pins
- Headings are suspended under track
- Stack back is less than conventional pleated draperies
- Draperies snap on/off carriers for easy installation
- Interior drapery appearance is identical to exterior-facing appearance

Pleated

- A classic header option
- Can be used with most track systems using slip-in or pin-on hooks
- Headings can be suspended under the track or over the face of the track to conceal hardware
- Four carriers per foot is standard, additional carriers or rings can be ordered

Cubicle

- An excellent choice where privacy is necessary; often found in healthcare facilities, this heading style can be used more creatively as a soft treatment room divider or a shower curtain rod
- Smooth, snag free operation
- Extra durable extruded aluminum constructions
- Inner surface is center grooved for easy installation

Architrac® at a Glance

To help determine which system is right for your project, use the guideline below to select the best fit. For more detailed information about each track, please visit our resource library at kirsch.com.

Top Hole Installation Guide for Estate™ Traverse Rods

Top Hole Installation Guide

This chart will position the bracket so the drapery will clear the floor approximately ½".

- 1. Find your pole style, size and header style in the chart.
- 2. Determine the desired finished drapery length.
- 3. Add or subtract number in the top hole column from the drapery's finished length to determine how high to measure for the top hole of the bracket.

Wall Mount Traverse Rods: Designer Metals™, Wood Trends™, Wrought Iron*
