

Name _____

Date _____

Estimate the quotient. Complete the tape diagram. Then complete the vertical form and check your work.

1. $63 \div 21 \approx \underline{\quad} \div \underline{\quad} = \underline{\quad}$

2	1		63

Check:

$$63 = \underline{\quad} \times \underline{\quad}$$

2. $72 \div 18 \approx \underline{\quad} \div \underline{\quad} = \underline{\quad}$

1	8		72

Check:

$$72 = \underline{\quad} \times \underline{\quad}$$

Estimate the quotient. Complete the tape diagram. Then complete the vertical form and check your work.

3. $95 \div 31 \approx \underline{\quad} \div \underline{\quad} = \underline{\quad}$

3	1)	95

Quotient:

Remainder:

Check:

$95 = \underline{\quad} \times \underline{\quad} + \underline{\quad}$

4. $84 \div 19 \approx \underline{\quad} \div \underline{\quad} = \underline{\quad}$

1	9)	84

Quotient:

Remainder:

Check:

$84 = \underline{\quad} \times \underline{\quad} + \underline{\quad}$

Divide. Then check your work.

5. $96 \div 32$

$$32 \overline{)96}$$

Quotient: _____

Remainder: _____

Check:

6. $54 \div 27$

Quotient: _____

Remainder: _____

Check:

7. $83 \div 21$

Quotient: _____

Remainder: _____

Check:

8. $95 \div 19$

Quotient: _____

Remainder: _____

Check:

9. Scott wants to find $78 \div 42$. First, he estimates the quotient. Then he uses his estimate to divide.

$$\begin{aligned}78 \div 42 &\approx 80 \div 40 \\ &= 2 \\ &\quad \begin{array}{r} 2 \\ 42 \overline{) 78} \\ \underline{- 84} \end{array}\end{aligned}$$

- a. What should Scott do next?

- b. Find $78 \div 42$.

Use the Read–Draw–Write process to solve the problem.

10. An auditorium has 25 seats in each row. How many rows are needed to seat 92 students?
