Presentation: Premature Failure of Structures and Vessels Due to Soluble Salt Contamination.

Abstract: This presentation will discuss premature corrosion being more common since the removal of red lead epoxies, the cause of premature weld seam failures corrosion-under-insulation(CUI) issues due to soluble salt contamination, and the ability to recognize these issues even though they are non-visible to the naked eye.

Biography: Tim Guidera, is the technical manager for CHLOR RID International for the West Coast Region. Tim has been involved in the coating industry since 1995, from working for a blasting and coating company to coating inspection. Tim is a level one NACE coating inspector and has been involved with CHLOR RID International since 2000 addressing salts on steel and concrete surfaces.
