Therese Willkomm is coming back to Hawai'i!

For ONE day only on TWO islands, Therese will be presenting a fun, informative and humorous Make and Take session to follow up to her *Assistive Technology Solutions in Minutes* workshop! Each participant who attends will learn how use an assortment of 10 different tools and materials including: Instamorph, corner guard, double face loop; one wrap; PVC, VHB, remo 2, coroplast; double coat white. Learn over 25 different tools and materials for making assistive technology solutions in minutes.

Workshop Objectives

- ◆ Make a PVC Transformer using color coded pieces of PVC pipe that is assembled into 10 different assistive technology solutions
- ◆ Make a Portable, adjustable, Slant board, book holder, and a scan a read stations
- ◆ Make an Eileen – an portable adjustable iPad holder, smart phone holder, document holder
- ◆ Make an Multi-use low tension spring clip that can be used in five different ways for hands free holding solutions
- ◆ Make a low vision device that can be attached to a cane, forehead or neck
- ◆ Make a universal cuff for holding objects such as a marker, stylus, drum stick, paint brush, spoon, or hair brush
- ◆ Make a tactile graphic overlay and sound bender for blind and deaf blind
- ◆ Make a multi-use bendable shapeable holding solution

Brought to you by the Hawai'i & Pacific Deaf-Blind Project, Easter Seals Hawai'i and the Assistive Technology Resource Centers of Hawai'i. A special thank you to the DOH Early Intervention Assistive Technology staff for assisting with planning and photocopying handouts.
