## **Important Facts about HealthWorks**

HealthWorks is a 501(c)3 not-for-profit Federally Qualified Healthcare Center and a NCQA-recognized Patient Centered Medical Home. The Center was established, as Cheyenne Health and Wellness Center in June of 2005. One third of HealthWorks' funding comes from a Federal grant. Grants from, the United Way, Laramie County/City of Cheyenne, Cheyenne Regional Medical Center and donations from community members and foundations represent a significant amount of our funding, with the remainder coming from patient fees. Patient fees come from private insurance companies, Medicare, Medicaid, Tri-Care and our patients themselves.

HealthWorks current patient population is approximately 4,000 and we provide approximately 10,000 patient visits annually. While our staff includes two Certified Application Counselors qualified to assist our patients to find health insurance on the Marketplace, more than 60% of our patients remain uninsured.

HealthWorks provides our patients with a Medical Home that offers:

- Same day/next day appointments and extended hours
- Three full-time family practice providers
- Case management and care coordination services
- On-site pharmacy and Prescription Assistance Program
- Our sliding fee scale for copayments begins at \$0
- Bilingual staff (English/Spanish)

Our pharmacy dispenses medications provided by the Wyoming Medication Donation Program, through our Federal Grant under the 340(B) Program, as well inventory we purchase. Our pharmacists can fill prescriptions written by any provider for almost any need. On-site specialists are available to assist patients with manufacturer's Prescription Assistance Programs.

Our Dental Program provides acute and preventative dental services to uninsured/under-insured adults both on-site and through a collaborative partnership with the Laramie County Community College Dental Hygiene Program.

We are currently working to integrate behavioral health evaluation and treatment into our primary care services.
