

ORION SHRINES TO SATAN

The purpose of this illustration is to suggest that the place of the 3 Pillars at Jamarat, Mecca depict the Orion constellation. In turn, such a pattern has an encrypted pattern of the Temple Mount building alignment that suggests the same source of patterns used for example in Teotihuacan, Mexico and Persepolis in ancient Persia as well. The 3 Pillars are said to have been the 3 occasions of which Abraham attempted to sacrifice Ishmael and was distracted by Satan. Abraham was led to through 7 stones at each point at Satan which became obelisks. Realize that an obelisk is a shaft with a pyramid on top. If one superimposes the Great Pyramids of Giza pattern over the obelisks of Jamarat, there appears to be an exact match. In this case the order of size is reversed. The 3 obelisks are al Aqaba, al Wusta and al Ulla.

THE GREAT PYRAMID PATTERN

Great Pyramids Pattern

EGYPT

What this study suggests is that the Orion alignment also encompasses the apparent configuration of what is presently on the Temple Mount in Jerusalem. The delineation of the building, that of the al Aqsa mosque, the Dome of the Rock and the Dome of the Tablets appear to match the angle, slope and correspondence of what was constructed at Jamarat.

Although the Muslims supposedly and piously seek to 'cast a stone' at Satan, it is apart of a pilgrimage and ritual of worship, all inclusive. In essence, such a place and observance pays homage to Satan. In present day depiction, the 3 obelisks have been replaced by a 'wall' and the site has been incredibly elevated on several layers of ramps to accommodate the throng of Muslim pilgrims.
